LD-8

June 12/80

Spent afternoon spotting traverses in northern part of map area, in vicinity Shana Mtn - Mt Headman and Mt. Dirom. Dense vegetation, gorges, hard landings & pickups just like everywhere else on sheet. Planned 20 traverses but thin is optimistic since I am sure that they are all too long & some almost impossible.

Stopped on Nakonake River. High fractured carbonates as elsewhere on thrust. Took silt - LDT1-58 and rock sample of above - LDT1-59.

Stopped at KS Lake to check fuel - Wolter & Red Fern Joint venture Red Fern & Complex. Can't remember anyone's name. They say Shamus Young coming to put camp in on Trapper Lake. Who's he?
