

NOTES
CINDERELLA

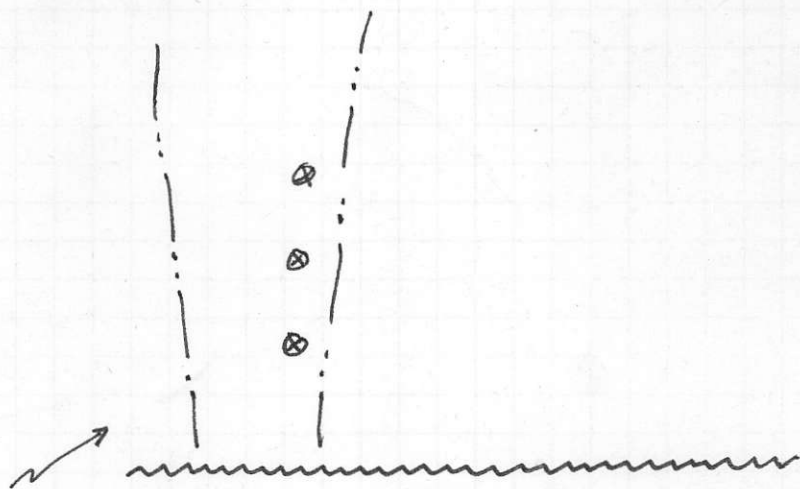

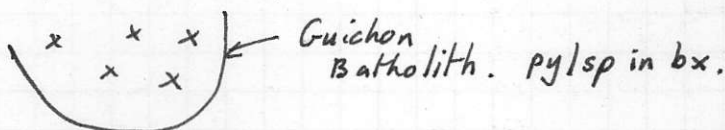

Location: Merrit, B.C., 4 miles E. of Craigmont Deposit

Host:

1 mile S. of (mineralized) Guichon
Batholith

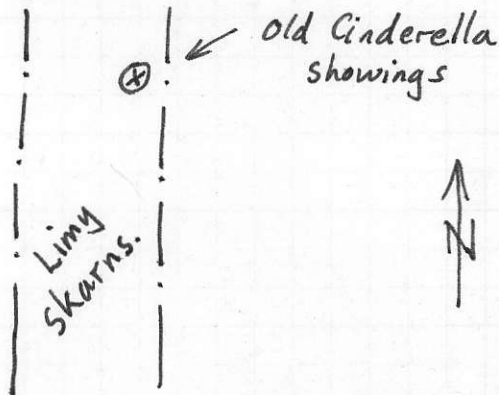

Mineralization: Zn, Cu

specularite, sphalerite, chalcopyrite in skarn

Extension
postulated on
basis of offset
magnetic pattern.

Confirmed by
trenching.

Note: ① Skarn width and
intensity increases to

N.

② Similar to Craigmont
except for specularite
rather than magnetite (alteration).

③ McMillan 1:50,000 geology map to be released in '79.
