

89.12.15

Fireweed

- Canadian United Minerals.

- reserves

① West Zone - IP target.

900,000 tonnes

9.97 oz Ag.

3.3% Zn

1.8% Pb.

[300m x 150 x 10]

vertical

{ hosted in a cherty sandstone unit.

{ mineralization - PY + SL^{+GL} disseminations
+ PG? (pyrargyrite)

{ hosted in argillite unit

{ mineralization - PY + PO + CP in bxia. matrix.

② East Zone - IP target.

not much drilling (10 holes)

#19 55m of .036 Au .50z Ag .3 Cu.

- potential

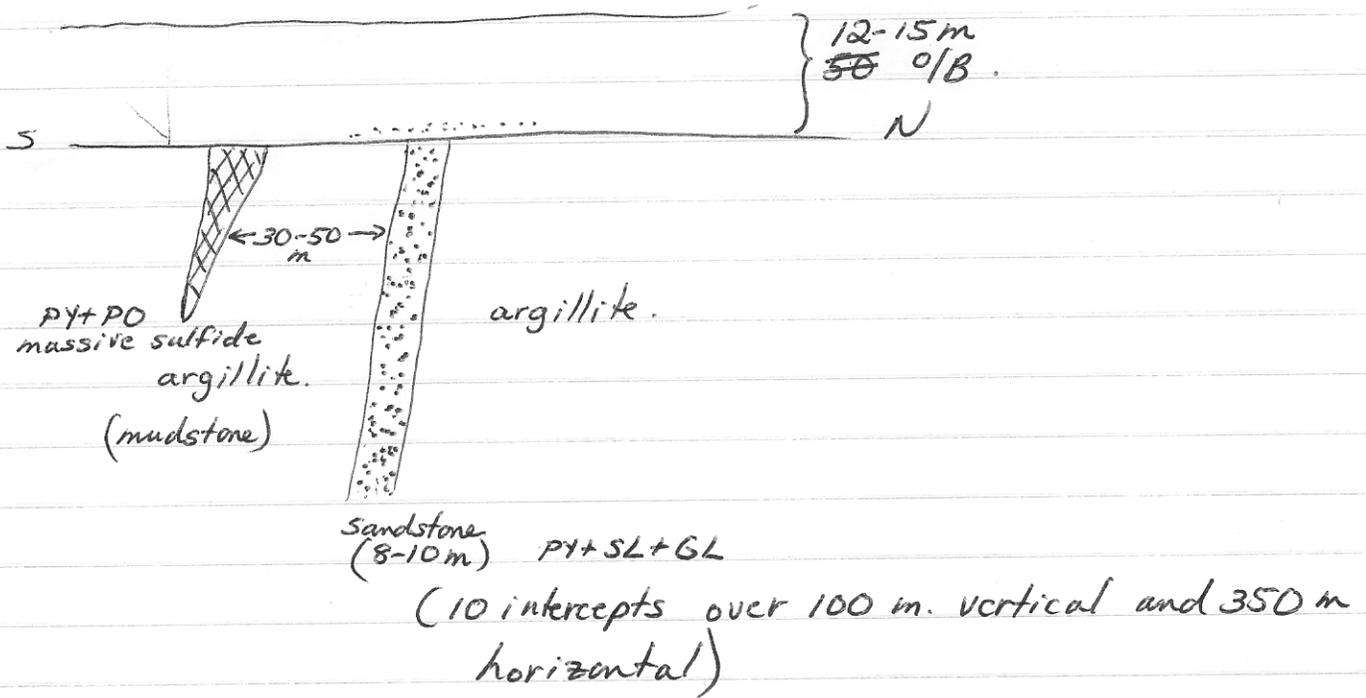

① ~~and~~ along strike - do more IP to the east

② down dip?

③ up and down section.

lots of potential for further exploration.

schematic x sect. - West Zone

note: east zone intersections look like massive sulfides in West zone (ie - drilling too far south)

notes on data reliability:

- many holes not systematically analyzed in mineralized zones
- hole locations not surveyed
- no ground control.
