

McDonald Claims
Bear Creek
Auesnel Mining Div.
B.C.

These claims are situated on Black Bear Creek, about nine miles from the town of Auesnel Dam B.C. with ~~to~~ which it is connected by a way or road.

The creek has exposed bedrock along its course. No work has been done.

The country rock ~~is~~ is slate, and a highly altered rock, probably a sediment. These are mineralized with pyrite in places, and cut by

a number of quartz veins. The quartz
veins average four feet in width and
are mineralized in places with
galena and pyrite which occurs
in isolated lumps.

Of 12 grab samples taken from
the property none of them assayed
~~more~~ over one dollar per ton.
