Dome Mines, Limited,
SOUTH PORCUPINE, Ont.,
December 16, 1925.

Department "E",
Dome Mines, Limited,

EXPLORATION 204, OMINECA MINING DIVISION, B.C.

Dear Sirs:

After an examination of the assay results, the following are my conclusions:

1. CLAIMS STAKED, MANSON CREEK DISTRICT

Of the silver-lead claims, all samples taken over mining widths showed results too low to be considered without railroad transportation. The average is: Lead 4%, Silver 2 oz. These represent the best parts of the veins. The claims should therefore be allowed to lapse.

Samples from the two claims on Slate Creek show Gold from \$1.45 to \$31.00, and silver from 2.7 oz. to 18 oz. The vein is only two or three feet wide, and while it would be worthy of some work if taken in conjunction with other operations in the district, it is not worth going so far for on its own account. The claims should be allowed to lapse.

In general, the iron and copper minerals in the Manson Creek district do not seem to carry gold values.

2. OTHER AREAS IN OMINECA DIVISION

The samples from the other areas visited fail to show anything of importance.

Two chalcopyrite specimens sent in by E. Kohse, Fort St. James, B.C., show Gold \$2.89 and \$4.96, silver 12.5 and 13.3 oz., copper 11.3%. These are probably from a location 15-20 miles N.E. of Nation River crossing. Mr. Kohse expects to work on this this winter and will send in samples and information.

Respectfully yours,

V. A. James
