

18.75% net revenue interest (25% working interest) and 9.75% net revenue interest (12.5% working interest), respectively, in these programs. Funding will be provided by the 2 recently completed private placements which netted the company's treasury \$1,030,250.

KENRIDGE MINERAL CORPORATION (KEN-V)

HALF INTEREST IN AN - Barrett Sleeman, president, announces that Kenridge Mineral Corporation is negotiating to acquire ARIZONA MINE SOUGHT 50% interest in the Portland mine near Kingman, Arizona. The other 50% is owned by Western States Minerals Corporation, a wholly owned subsidiary of S.J. Groves & Sons Co. of Minneapolis. Mr. Sleeman says the property is currently being prepared for production (but does not identify the product). Management expect negotiations to include a major financing.

Kenridge has withdrawn from negotiations to acquire a land interest in the Wenatchee area, Washington.

Directors have agreed to grant a further management incentive option to Mr. Sleeman for 30,000 shares at 40¢ each, good through 18Sep86.

AMBERHILL PETROLEUMS LIMITED (APT-V)

OHIO GAS WELLS ARE - Amberhill Petroleum Limited, on 18Sep84, granted directors' and employee incentive options to buy BEING TESTED NOW a total of 311,830 common shares at 15¢ per share, good for 1 year, subject to shareholder and regulatory approval. Lorenda Bardell, secretary, reports that Pioneer Drilling Co. of Payne, Ohio have taken over as operator of the Harrisville, Indiana oil/gas prospect in which Amberhill holds 22.5% interest, subject to 2-1/2% gross overriding royalty. Calculated open flow potential of the Carl Tibbet #1 well is 540,000 cubic feet. Mr. Von Plonski of Von Engineering states, "I would expect this well, barring any unexpected problems, to be capable of producing approximately 100,000 cu.ft./day over a time period of from 1 to 1-1/2 years, then slowly decline."

Work will start within a week to complete the Harris #1 well for a gas test and potential flow test, followed by tests to the Welch #1 and Frazier #1 wells.

AMAZON PETROLEUM CORP. (AMZ-V)

INTEREST IN NEW PROPERTY TAKEN UNDER OPTION - Al Chunick, president of Amazon Petroleum Corp, has reported acquisition from Genex Resources Inc. of an option to earn a 60% interest in the Baron Mine at Ashland, Oregon by spending \$90,000 on exploration. The property produced from two levels, prior to 1934, from a vein which has been traced on surface over a 5,000 foot length having widths up to 45 feet and with the grades varying from 0.25 to 2.76 oz.gold/t and from 6.60 to 69.11 oz.silver per ton. J.P.Elwell, P.Eng., has estimated 12,000 tons of ore blocked out remaining in the stopes and has recommended a \$150,000 program including 7,000 feet of diamond drilling. (See GCNL 181, page 3 for recent results from the Carpenter Lake gold property.)

Amazon has a \$75,000 program underway on the property in the Horsefly area, B.C. The 40 claim units adjoin the Eureka-Amoco gold discovery property on the east side close to the drill sites. (See map in GCNL No.46(1984) for Eureka-Amoco property. Mr.Chunick says the engineer's report indicates the contact zone bisects the southeastern section of the claims.

RAMM VENTURE CORPORATION (RAV-V)

UNDERGROUND ASSAYS CONFIRM SURFACE TRENCH VALUES - H.John Wilson, director of Ramm Venture Corporation reported further assay results from surface samples and from underground sampling on the Copperhill property 30 miles NE of Houston, B.C. The 28 new assays are from samples on the Rainstorm and Puby Extension zones. (See map overleaf page 3 for detail assay results and overleaf page 2, No.173, 7Sep84 for earlier sample locations and assays).

Underground samples in level 1 at 4540 ft. elevation and level 2 at 4450 ft. elevation on the Ruby has assisted in correlating surface and subsurface geology. The samples from underground are across widths from 1 to 4 meters and showed the following range of results: Level No.1: copper 1.44% to 3.86%, zinc 6.43% to 24.49%, silver 3.59 to 7.80 oz.per ton; Level No.2: copper 0.04 to 3.64%, zinc 0.09 to 20.07, silver 0.2 to 11.00 oz./t.

Additional geophysical, geochemical and geological surveys are in progress as part of Phase II of the exploration program. A diamond drill program has been recommended to test the five mineralized zones. A drill contract is under negotiation with the first hole expected to start by the end of September.

CONSORT ENERGY CORPORATION (CEW-V)

DRILL TARGETS LOCATED ON CLAIMS ADJOINING - Harry Bygdnes, president of Consort Energy Corporation has reported that THE LUPIN GOLD MINE CONTWOYTO LAKE N.W.T. geophysical surveys consisting of proton precession magnetometer, very low frequency electromagnetic and vertical gradient surveys, plus surface sampling and mapping have located six diamond drill targets on the SE portion of the Contowoyto Lake claims, 300 miles north of Yellowknife, N.W.T. Three major companies are reviewing the results and the president expects to start negotiations shortly towards a joint venture drilling program.

FOR THE RECORD

GALIT RESOURCE CORPORATION common shares were listed 19Sep84 on the Development Section of Vancouver Stock Exchange, symbol GIC. Of 20,000,000 shares with no par value authorized, 1,355,001 are outstanding including 750,000 in escrow. Transfer agent is Canada Trust Co. Sponsoring member is West Coast Securities Ltd.
