① - Coles Creek - Cu Mo Pb Zn

claims

- RYAN (4968) (1) Westbank Resources Inc
expires Jan. 5/87
- SOUTH MARK (4966) (1) Canuck Resources Corp
expires Jan 5/87

② Swannell - Captain

claims

- SWING 1-4 are forfeit
- SAM 3 (2444) (2732) Tahtsa Mines Ltd
420-890 W Pender St
Vancouver B.C.
expires Apr 25/89

③ Price claims (4751) - Tom Richards

expires Sept. 7/86

- Ⓐ .82 Cu 3.08 Zn 1.34 Pb 4.6 oz Ag
- massive sulfide lens (~.5 m thick) vein?
- Ⓑ 2.4 Cu 13.6 Zn 2.48 Pb 26.4 oz Ag 0.03 Au
- massive sulfide lens. (~.5 m thick) vein?

Kasalka Proj. - geology.

- See MacIntyre.

Kasalka Group (lower to upper Cretaceous - in part Tertiary?)

- continental volcs

- v) basalt (flow) unit
- iv) rhyolite unit (flow)
- iii) lahar unit
- ii) porphyritic andesite (flows) unit
- i) felsic (pyroclastics) unit
- i) basal pebble congl. (red-polymictic)

Skeema Group (lower Cretaceous)

- shallow marine & fluv.

- iii) marine sed unit
- ii) amygdaloidal basalt unit
- i) basal boulder conglom. unit

Hazelton Group (lower to middle Jurassic)

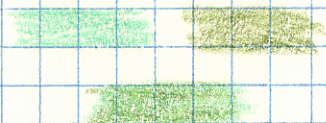

- marine volc & sed.

geology cont'd. page (2)

- ii) felsic volc & chert unit (Smithers Fm)
minor argillite & feld. wacke
- i) andesitic frag. unit (Telkwa Fm)

* sites for heavy mineral samples on 93E/11
indicated by blue dots.

- map in case with other 50,000 scale maps.

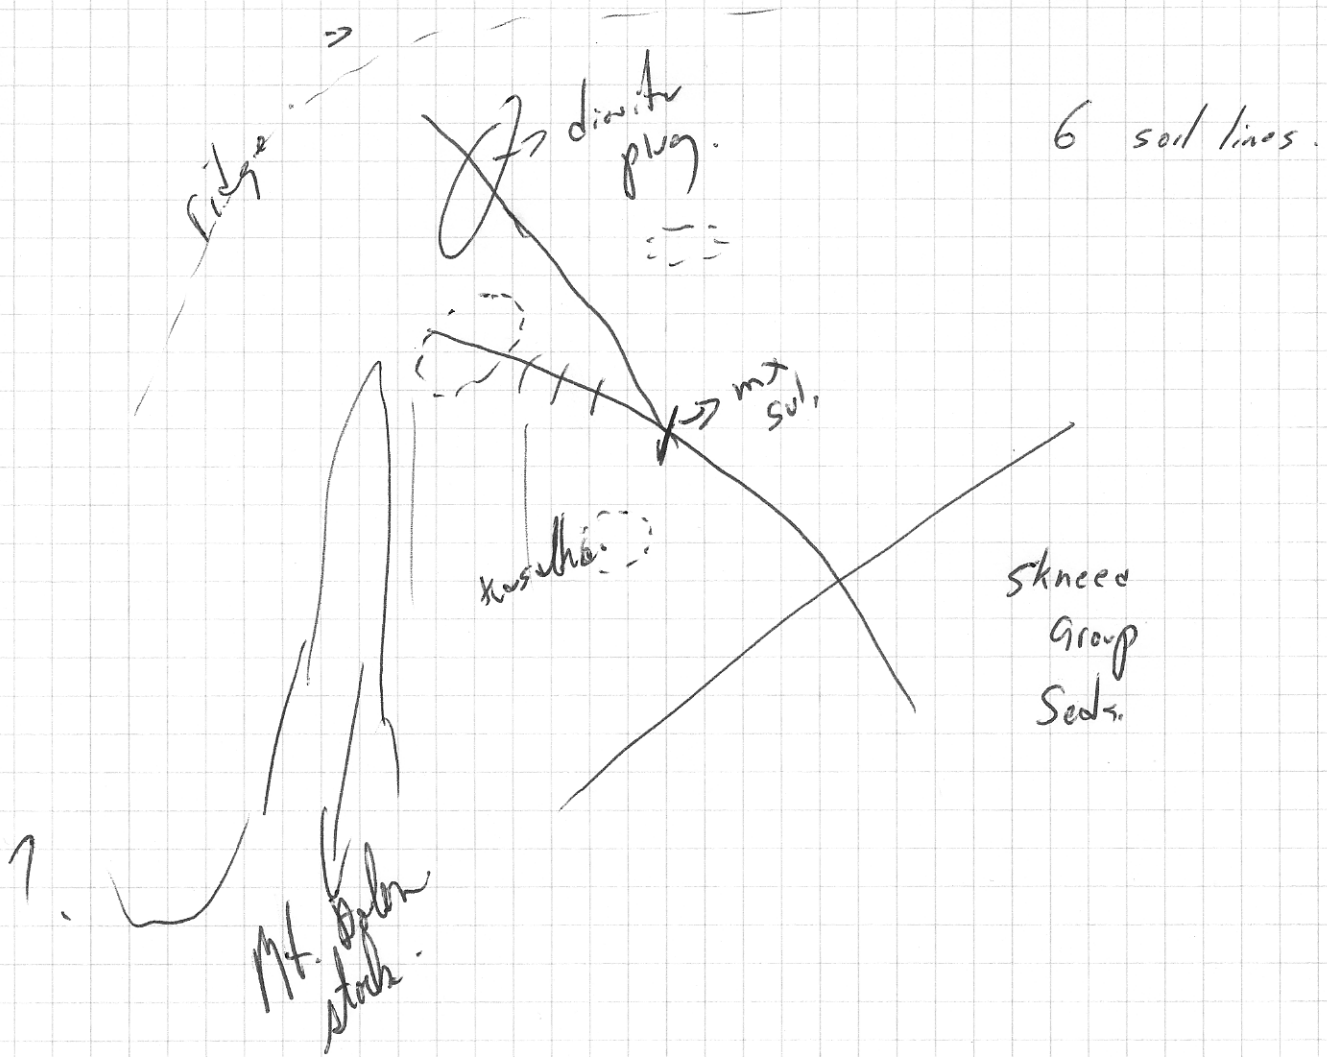

11507 - Price Claim.

→ sulphide lens in creek, at junction of upper branch.

→ map shows sulphide lens up-the-creek, south fork.

→ Geology. → north-south strike
of Kasulha Ant. East, breccia, flows

□: soil Anomalous.

Pb, Z.

→ 50-80 ppm - Pb.

100-200 ppm Zn.

with Ag.

- 1.5 ppb - -
