MEMORANDUM:

TO: Exploration Staff

DATE: August 10, 1988

FROM: Ed Kimura

RE: **SAMPLE SHIPMENT**

With reference to the attached memorandum from George Rodger; it is imperative that a Sample Shipment Memo is included with each box or sack of samples. One Sample Shipment Memo to cover a shipment of two or more boxes can only create problems at the lab, especially if one of the boxes does not arrive. It is strongly urged that this request be strictly administered so that your samples are processed without confusion and delays at the lab.

Also after several discussions, we have decided that diamond drill sludge samples should be tagged with our sample book numbers. The system of using the drill hole number and from/to for the sample number is not convenient for data entry as the PAI does not have sufficient columns allocated for this type of sample identification. Furthermore if the sludge samples are wet, the felt pen marking system frequently fades and becomes difficult to decipher.

E.T. Kimura
