

- ROCK TYPES**
- X X X X Hypabyssal andesite : fine to coarse grained and porphyritic chlorite altered
 - U U U U Ultramafics : chlorite - actinolite altered, fine to coarse grained, magnetite bearing
 - A A A A Diorite : medium grained
 - Shear zone : orientation as indicated
 - Massive quartz
 - Quartz diorite dyke
 - Mafic dyke
 - Breccia : monomict, clast or matrix supported clast type according to other rock symbol
 - foliation
 - a quartz vein (thickness)
 - gouge
 - cb carbonate vein (thickness)
- ALTERATION**
- C Clay alteration (includes sericite and unknown bleached zones)
 - S Silica alteration
 - L Chlorite / talc alteration
 - Cb Carbonate alteration
- MINERALIZATION**
- py pyrite
 - po pyrrhotite
 - cpy chalcopyrite
 - aspy arsenopyrite
 - mr mariposite
