Bill Bacon (telephone)

Sub (1)

Burn Group

1st hole (L2) best assay
0.04 % Mo

2nd hole (L1) 752' (yesterday AM)
(going to 950')

0 - 400' barren

500 - 600' some moly (not much)

Rock in core is quite dark
(monzodiorite); not leucocratic
enough for moly deposit?

Quartz stringers throughout; some
moly on margins in some
places.

Next hole will be L4 (1300')

L3 will be cancelled (unless

Bill Batel can find route
for cat to site).

(Cat has been damaged on
rocky ground)
