# Work Proposal Exploration

Property or Account BEECE CREEK

Estimated Expenditure \$ 58,000.

District or Office Western District Period Jan. 1/81 To Dec. 31/81 Date 5 August 1981

### Statement of Proposal

An airborne magnetic survey to try to localize "gaps" in the basalt cover was done, followed up by geological mapping and reconnaissance soil sampling to test the possible existence of Au-Cu mineralization of the Fish Lake-type.

### Summary of Proposal

The Beece Creek property is located adjacent to, and south of, the Fish Lake property in the Clinton M.D., about 130 km southwest of Williams Lake.

The property area, mainly comprising a flat terrain covered by bush and swamp with very few outcrops, was mapped as underlain by Miocene basalt in the central part, and volcanics and pelitic and psammatic sediments of the Upper Cretaceous Kingsvale and Lower Cretaceous Jackass Mountain Groups and Eocene granodiorite in the southern part. Due to its proximity to the Fish Lake deposit it was postulated that the volcanic cover could be missing or very thin in places, "window(s)" that would allow a check for mineralization, alteration, and rock types present at the deposit. No Cu or Au soil anomalies were found.

### Tenure

Bethlehem Copper Corporation staked 13 claims (Eko 1-13) consisting of 260 units adjacent to, and to the south of, the Fish Lake property early in 1981. The Beece Creek property includes the central and southern claims of the Eko group, and therefore, not included in the Fish Lake option by the 3 km perimeter clause.

### Estimated Expenditures

Salaries: permanent	\$ 7,248.42
temporary	5,063.47
consultant	4,332.00
Geology: miscellaneous	817.99
Geochemical analyses	5,877.98
Transportation: truck rental and fuel	4,812.21
Domicile	5,920.18
Drafting and reproduction	1,287.82
Communications	639.93
Airborne magnetic survey	6,000.00
Tenure	4,200.00
Total Field expenditures:	<u>\$46,200.00</u>
Administration:	<u>4,620.00</u>
Total:	<u>\$50,820.00</u>

Previous Expenditures None
