

100

Sil andesites, microdiorite bx  
patchy fracture controlled Py  
minor cpy

A 27555

Mixed andesite, microdiorite  
monzonite (FP) bx patchy Py  
Some fine cpy

A 27556

As above carbonate  
veins along structures  
fracture controlled cpy Py

A 27557

Fracture zone  
Vertical slickens

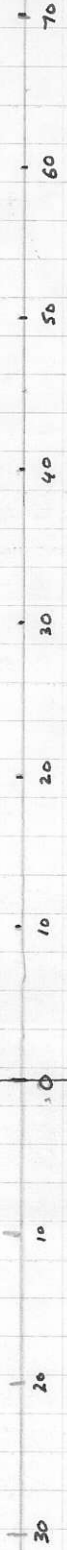

strong fracturing along fault  
local strong malachite staining  
numerous carbonate veins  
patchy sulfides.

A 27558

Strong sub vertical structure  
follows adit. sub parallel  
carbonate veins/peridots  
significant malachite staining

A 27559

O/c in bank - entrance to adit.  
strongly fractured variably, local  
strongly carbonate altered and veined  
med green andesite, local  
microdiorite  
alteration is chlorite/carb.  
areas with upto 5% mc fracture  
controlled Py minor cpy.
