

## 1976 BASAL TILL SAMPLING

9 May 76

EXAMINATION OF CHIPS

4E	24N	Andesite and quartz diorite
	28N	Andesite, 4% py
	32N	Andesite, grey, some rhyolitic fragments
	36N	Andesite, some quartz diorite
	40N	Rhyolitic (one fragment observable only)
	44N	Quartz diorite, and possible border phase, 2% py
	48N	Andesite, silicified, 5% py
	52N	Rhyolite to Rhyodacite, banded in part.
	56N	Quartz diorite, rhyolite, and border phase
	60N	Diorite, pegmatitic.
12E	24N	Andesite tuff. Minor quartz diorite
	28N	Rhyolitic, or highly siliceous alteration, 3% po
	32N	Very mixed. Andesite, grey, some rhyodacite, <sup>5% py</sup> <del>and diorite</del> <del>fragments</del>
	36N	Andesite tuff, minor quartz veining.
	40N	Quartz diorite and andesite, very highly rusted. Fault?
	44N	Quartz diorite (1 fragment only observable)
	48N	" " " " "
	52N	Quartz diorite, and gouge?
	56N	Dioritic pebbles (well rounded)
	60N	Quartz diorite, very clean, trace py.
20W	4S	Quartz diorite and andesite tuff
	8S	Andesite tuff and quartz diorite.
36W	B.L.	Andesitic? 3% py
