Luc Syndicate - B.C.

Luc Syndicate - B. Bacon } Bacon & Crowhurst
J.J. Crowhurst } Consulting Engineers
Comwest Exploration Co. Ltd.
Dome Mines.

Redwater Oils. → Western Minerals / Brascan

1971 - formation of Luc Syndicate
- to search for a large Cu or Cu-moly
deposit

Location - Omineca Mtns from $50^{\circ}30'N$ to
 $56^{\circ}15'N$ and 125° to $126^{\circ}15'W$.

Burn group - specific project MTS 93/N-26,11
lat. $55^{\circ}30'N$
long. $125^{\circ}15'W$.

Amax discovers Lennac Lake Cu property

1972 - main Luc program in the Babine Lake area
- continued work in the Omineca River area
- BURN project con't.

1973 - work in the Babine Lake area - $55^{\circ}05'N$; $126^{\circ}25'W$
Omineca

- Fort Claim group - po, py + chpy in peak of
Old Fort Mtn.
- some work also undertaken in the area north
of Takla Lake.

- Burn project - follow-up program proposed ~~including~~ including drilling, Comwest declined to participate

- Lennac Lake program - NTS: 93-L-9, 16

54°45'N ; 126°19'W

→ joint venture between Amax Potash Ltd., the LVC Syndicate, and Standard Oil Company of B.C.

- Cu mineralization.

- Takla Lake area - L10N I & II claim

groups & NTS: 93-M-16E

55°54'N; 126°05'W

- Cu mineralization in volcanics

- Hd group - Babine Lake Area

- property on the Fulton River in the Babine

Lake area NTS: 93-M-2

55°04'N; 126°45'W.

- possible dissem. Cu-moly occurrences of the porphyry type.

1974 - IP survey on the Burn claims

- ~~Lenna~~ Lennac Lake Paill program → 44

percussion drill holes in 1973 & 5 diamond drill holes in 1974.

- ~~Dome caused~~

1975 - Dome carried out exploration program on the Burn Group in 1975

- work on Burn #1 Group - Kwanika Creek area NTS 93-N-6,11

- previous work on Burn Group is moly + Cu geochem surveys, mag surveys, I.P., trenching + 12 diamond drill holes did not reveal significant mineralization is source of moly anomaly.

- in 1975 geology mapped + float examined, several more drill holes recommended.

~~1976 - more drilling on Burn Group - nothing of sign. revealed.~~

~~1977 - Col claims dropped.~~

1976 - Drilling on Burn Group revealed nothing of significance.

- no further work was recommended.

1977 - Col claims dropped.

1979/80 - Burn group farmed out to Placer Development - they did a ~~see~~ re-evaluation of the property, but could not find ~~source~~ account for moly anomaly.

1980 - Burn group given back to Dome.
