

## Notes on Lindquist Lake

- Pers. Comm. Nick Carter Feb 14/89

Phone 477-0419 (Victoria).

1. Terry has some data on the Deerhorn and Pioneer properties. Nick will talk to him about sending it up. Phone Des and inquire.
2. Drilling on Pioneer: circa 1946.
3. Deerhorn underground drilling: early 1950's.
4. Gov't will open Lindquist Lake area to staking on paper but will probably solicit proposals from interested parties. Proposals will be considered based on the nature of the program, the amount of money to be spent and the company submitting the proposal, i.e. does the company have an interest in the area.
5. A reference is Frank Jubin, initial discoverer of the Blind River uranium deposits. He is living in Toronto (?) and has always been interested in the Lindquist Lake deposit. He has all the old drilling data and detailed geology data. DO NOT CONTACT. (GLEN)

6. Ground is supposed to come open in the Chickamen Range in mid March. Also in the Mt Alcock area around Williston lake north of the Cirque property.
