Dear Mr. Brehaut:

Thank you for your February 15th letter requesting additional data regarding our mining properties.

Please find enclosed data and material regarding our "Morning Star" properties plus some preliminary data regarding our new "OGG GROUP" property.

Our corporation lacks the capital for the necessary examination and exploration of our properties.

Included with above data is a 20 year old map and assay report taken by an independent mining engineer of our East Morning Star property showing excellent gold values.

Our Morning Star properties have a greater potential than other properties all around us put together, except for one property. This property is our neighbor, Ottawa Mine, which has equal or greater potential than our properties. The Ottawa has been active and producing for about eighty years.

Our Dayton Mine has been opened, water drained, making access possible inside the tunnel showing the vein system plus a new discovery found near the bridge.

Preliminary examination of our new "OGG" gold property shows a number of vein exposures with good gold values and the possibility of a large tonnage deposit.

If you are interested and wish to examine our properties you may contact our mining consultant, Mr. Louis C. deKock, who resides in Slocan, B.C. and will arrange to show you our properties. His address and phone number is as follows;

Louis C. deKock
Box 149
Slocan, B.C. V0G 2C0

Phone: 604-355-2269

If you have questions, you may reach me weekdays at 312-648-6671.

Sincerely,

George Oldziewski
George Oldziewski, President
