Thats right, except I have it as \$80K. Geophys and Geochem done in November. I found out about it at Yukon Geosci from Seamus.

Paul, were you aware of Logan Res. doing any work at Albert Creek last year? NRCAN has them down for \$100K.

**Tom**

**Subject:** Northwest Geology to Oct 4, 2002

**Del Norte** - Teuton Resources Corp reports 0.179 oz/ton Au and 18.4 oz/ton Ag across 10 metres from chip sampling of a recently discovered structurally controlled mineral zone, a quartz-base metal cemented breccia vein. The discovery is in an active snow / rock chute about 0.5 km from 104A 161 and mineralization appears to be similar. Drilling (from a safe site) is in progress. Teuton's press release notes the stratigraphic position is similar to Eskay Creek but does not state that it is a vein breccia. Mountain Boy Minerals staked 56 units adjacent to Teuton's Del Norte claims.

**Albert Creek** - Drilled one hole to test a magnetic and silver geochem anomaly. Eam Group mudstone, McDame limestone and serpentinite were intersected. No information available yet on mineralization intersected.

**Table Mountain Gold Mine** - Cusac announced it has defined 22,000 tonnes at 33.78 g/t Au by 6 drill holes on the east extension of the Bain vein. Vein width averages 1.45 metres. Past production from Bain vein was about 55,000 tonnes at 14 g/t Au. Cusac raised \$525,000 and is continuing to drill. Am trying to determine resource threshold to re-open the mine and mill requirements.

**Praxis** - Drilling by Northgate Exploration and Praxis Goldfields has concluded. Total drilling was 2483 metres in 7 holes.

**SIB** - Heritage Explorations Ltd. has begun a 2-drill, 4000 metre program (within its \$1.1 million program). The company hopes for a major break-through by deep drilling, as there are 112 mainly shallow holes at SIB. Re-logging of drill core has revealed problems of interpretation and consistency in the original logs which, in turn, has weakened Heritage's mineralization model that was based on those logs. Targets for about 2500 metres of the program: McKay zone (3 ddh), Battleship knoll (1 ddh), Lulu zone (1 "hail Mary" ddh to test below the Coulter thrust fault) and Marguerite zone (1-2 ddh). Heritage has negotiated to acquire the 50% interest in the SIB and Megan claims it does not own from Uniterre Resources by a series of cash payments totalling \$750,000. This is a key step in the Heritage goal to consolidate the Eskay Creek district.

**Nai Kun Wind Development Inc** - Subsidiary of Uniterre Resources is moving into the alternative energy business with a wind farm proposal in Hecate Strait, offshore from Naikoon Park in the Queen Charlotte Islands!!

**Morrison** - NWMDRC meeting initiated by Pacific Booker Minerals (Oct. 1) with Mike Farnsworth (author of report), Paul Stevenson and Chris Sampson. Only broad concepts so premature to initiate process: approximate ore reserves, no proposal for mill size and location, only vague notion on tailings and waste rock sites, spotty baseline environmental work etc.

**Thorn** - First Au Strategies has reduced its financing objective in (faint) hope that it will be still be able to drill the Thorn high sulfidation prospect in the Atlin area. Will fall weather oblige?

**Maroon Mtn** - Examined drill core with geologist Tony L'Orsa in Smithers on Oct. 2. Gold-bearing quartz vein is in a folded Bowser Lake Group sand /silt/ mudstone sequence which includes an interesting submarine slump(?) conglomerate with variably flattened and elongated cobbles up to 10 cm. Cobbles are mainly fine grained sedimentary (chert, limey siltstone) with up to 1/3 intrusive (feldspar phryic) and minor volcanic rock which suggest provenance from underlying Stikine terrane.

**Tide (104B 129)** - Plutonic Captial Corp. optioned property north of Stewart from Rimfire Minerals Corp. Drilling of high gold and silver vein targets, and prospecting continuation of structures is planned for 2003.

**Noranda** - Office visit by Gilles Bouchard (Canadian exploration manager, based in Laval) and Mike Savell (senior geologist, based in Toronto). Introduced to available regional staff. Discussed Kerr property and other exploration and

**Subject:** Report to May 3, 2002

RDN - Barrick has agreed to an option to earn 75% interest from Rimfire Minerals Corp. by spending \$1.5 million on the property by end of 2005, and making \$25,000 annual cash payments. Significant rise in Rimfire stock price after announcement of deal with Barrick.

**Foremore** - Scott Broughton and John Mirko of Roca Mines Inc. visited Smithers to promote their 'property of merit' and sell 'seed-level' shares prior to their IPO, scheduled to take advantage of super flow through financing in 2002. The anticipated \$250K will be used to upgrade geologic mapping, focused on a new target area. Previous exploration (by Cominco) was based on the interpretation that the mineralized boulders came from beneath More glacier. Roca believes they originate from collapse of locally derived, side valley moraine. This is based on a new interpretation by geomorphologist Wayne Savigny (ex-UBC prof) and supported by new mineral occurrences found by prospector/property vendor Lorne Warren. Equity Engineering will do the field program.

**Spectrum (104G 036)**- plan to do an IPO on Australian Stock Exchange to finance development of this porphyry copper related gold vein prospect east of Iskut village, and on the margin of Mount Edziza Park. Trans Pacific Mining will be the issuer and acquire Arkaroola Resources Ltd (Canada) as a subsidiary. This proposal is being used as leverage to remove the claims from Recreation Area status and provide a ground access corridor (as recommended by the Cassiar LRMP but not yet implemented). Resource estimate is 289,600 tonnes at 18.65 g/t Au at a 10 gm cut-off (Columbia Gold Mines, 1991). Company aims to conduct exploration this year, preparatory to a feasibility study this winter for a 120,000 tonne per year mine.

**Galore Creek (104G 090)** - First Quantum Minerals is a mid-tier mining company interested in development of this copper-gold porphyry deposit 50 km northwest of Snip mine. To meet with Ministry executive in Victoria. Indicated resource of 284 million tonnes at 0.67% Cu (+ significant gold).

**Fireside Barite (94M 003)**- Last of 2001 production sold/shipped this week from plant site in Watson Lake. Fireside Minerals Inc. has filed NoW to produce another 10,000 tonnes of barite this season from 13,000 tonnes of ore from the Bear vein.

**Red Mountain (103P 086)** - Seabridge Resources has finalized their acquisition of this gold deposit near Stewart. MEM has reduced the reclamation deposit from \$1.5 million to \$1 million, with 350K going to Seabridge and 150K to the former owner, Wheaton River Minerals.

**Kaska Energy and Mining Forum (April 23-25)**- Gave presentation on Ministry role in mining and brief summary of current activity, and provided transportation for Seamus Young (Logan Resources) to attend. Items of interest:

- SNC Lavalin - Kaska partnership company aiming at reclamation of Ketz and Faro, orphaned mines under federal government responsibility.
- Akita Drilling - Kaska partnership company has one jointly owned oil/gas drill rig working in NEBC. Akita may give preferred customer status to Fireside Minerals barite (drilling mud), to further assist the Kaska who gain considerable employment at Fireside's mine and plant.
- Kaska re-iterated dissatisfaction with reclamation at Cassiar and historic placer disturbance on McDame Creek. Logan Resources offered Kaska direct involvement in Albert Creek project (manto? sedex? northwest of Good Hope Lk) by a private placement share purchase. Kaska/Logan discussions continue but an IBA (impact-benefits agreement) may be more likely outcome. Rumour that financing deal from a conventional source is in progress for this twice-deferred drilling project.
- Re Kemess - Kaska concerned with no hiring from Kwadacha (Ft. Ware) and possible water quality impact of the mine downstream at Kwadacha. Desire to do their own watershed monitoring.
- Kaska to resolve overlapping territorial claims with neighbouring aboriginals, to facilitate dealings with industry and

**Silvertip-** Imperial Metals concept of an open pit mine evolving to underground operation seems to be comatose (if not dead), due to concern over the pit acting as a large funnel for water into the underground workings. Project is still at the exploration stage- needs more reserves.

**Ace claims-** look for KRL Resources to try and ride interest in upcoming Silvertip drill program to explore for similar style mineralization. Strong silver geochem and good geophysical signature.

**Rock Talk (Smithers Exploration Group)-** recruiting speakers. Looks like date will be Feb. 29 and Huckleberry trip on March 1.

Begin work on preliminary version of **Mining and Exploration - 1999** and planning Roundup display.
