Paris, France

Dear Professeur Guillemin:

Dr. Gerry Ray passed along your letter dated December 2, 1991 informing us that my sample of ruckidgeite arrived safely, and your kind offer to provide anything in trade from your exchange material's list. I would be particularly interested in a colourful crystal form of any mineral, but if I had to choose I would pick BERYL.

Thank you, and if I can be of any further assistance please don't hesitate to contact me.

Yours truly,

Tom Schroeter, P.Eng.
Sr. Regional Geologist

Dear colleague,

After your friendly letter of 24/1/92, please find here, in return,
what we have about BERYL microcrysts. Hoping you will be satisfied by,
and we could so continue our able exchanges' relationship,

With our best wishes for the New Year,

Sincerely yours

C. GUILLEMIN

P.S. - Among other rare species studied into your laboratories, much
interested to obtain also : TULAMEENITE, GEVERSITE from Tulameen, even in
micrograins or sections, if you have one or another for our next exchange ?

Dear Colleague:

Just a short note to sincerely thank you for the 'exchange' package. The box arrived safely. I don't believe I (we) have any Tulameenite or Geversite from the Tulameen district. Nonetheless, I will keep it in mind and certainly would be pleased to send you a sample if I'm able to locate one.

Yours truly,

Tom Schroeter, P.Eng.
Sr. Regional Geologist
