News Release

Eagle Plains Acquires "Abo" Gold Deposit

Cranbrook, B.C. 18 January, 2001: Eagle Plains Resources Ltd. (EPL:CDNX) is pleased to announce that it has received title to 29 claim units (1760 acres) containing the Abo (Harrison Gold) deposit, located 130km east of Vancouver near Harrison Lake. Property mineralization consists of a number of gold occurrences associated with a series of small intrusive stocks. Accessory minerals include copper, silver, lead, zinc, molybdenum, tungsten and bismuth. The property is road-accessible year-round, with hydroelectric power and rail-service located within 3 kilometers of property boundaries.

The property area has been held or optioned by various operators since the early 1970's including Abo Resources, Kerr Addison Mines Ltd. and Bema International Resources. Exploration work has included mapping, soil sampling, ground-based geophysics and a total of 13,856m (45,448') of diamond drilling. Some small scale underground development has also been completed. Most of the work was focused on the northern part of the property in the area of the Jenner and Portal Stocks. Drill results from the Portal Zone include 30 meters averaging 3.17 grams per tonne gold (EMPR ASS RPT 19584). Drill results from the Jenner Stock include 64m averaging 3.77 gm/t (EMPR ASS RPT 20144). In 1987, Kerr Addison collected a 1053 tonne bulk sample from the Jenner Stock underground workings. Using the metallurgical results from this sample combined with extensive underground sampling and results from diamond drilling, Kerr indicated a grade of 3.2 4.1 g/t Au with an inferred tonnage of 1.3 million tonnes from surface to 100m elevation, and 2.2 million tonnes from surface to sea level (EMPR ASS RPT 20144, MINFILE #92HSW092). Other gold-bearing stocks identified on the property include the Hill and Lake Stocks. These areas have seen limited exploration in comparison to the Jenner-Portal Stocks areas. Diamond drill intersections from the Hill Stock area include DDH BX88-130 which averaged 3.54 g/t Au and 6.3 g/t Ag over 27 meters, and contained 8m averaging 8.7 g/t Au and 14.2 g/t Ag (EMPR ASS RPT 20144).

Eagle Plains acquired the property by staking late in 2000, and intends to carry out a comprehensive compilation of existing data. The company also plans to re-evaluate existing reserve calculations, initiate metallurgical studies, and assess the exploration potential of under-explored areas of the property.

On behalf of the Board of Directors

Subject: Abo Gold property

Hello Chuck Downie,

Thank you for the invitation to visit the Abo Gold property. Tom Schroeter and I were at the property on Tuesday March 22. Peter and Bryson outlined the highlights of the drilling program and also showed us some of the core.

Do you have a figure for total expenditures for the phase of exploration just completed and do you have an approximate date on when results may be released?

While there I noticed the the RN adit is now accessibe due to the lack of a few iron bars at the portal (see photo). This is a particularly undesirable situation due to the close proximity of Harrison Hotsprings. I suggested to Peter and Bryson that they check the Jenner adit.

While I am not an Ministry inspector and do note that there is a good gate on the property, I suggest that the RN adit, and Jenner adit if in the same condition, be secured to prevent access. I copy permitting / inspection staff so that they may respond if necessary

Thanks, Tom

We've been in contact with Ben, and are slowly making some headway.
Have a good summer, yourself.

Tim

Likewise - good to see you folks! Motto for BC - "Game On!" (we're back on the radar screen, in a big way!). PDAC should be the next "bang up" event. Cheers, Tom.

Tom:

It was good to see you at Round-up (however briefly). I received your fax this morning-thanks for the reference. We have a call in to Ray this morning, and are eager to speak with him about Abo. I will let you know how things work out.

Tim

Tim, Chuck mentioned that you guys were still trying to track down some more info. Specifically, I believe he mentioned someone from Global Resources. I suggested to him that perhaps Jo Shearer at Homegold Res. (604-970-6402) might have been part of the group at (New) Global Res.. Also, in '98/'99, Ben Ainsworth (604-684-6463) was actively involved - he'd be a good contact. Sorry I missed you last week in Cranbrook; have a good summer. Tom.
