**News Release ... Acquisition of software products completed ahead of schedule**

Mr Steven Radvak reports

The company has completed the acquisition of its main software products from the vendor, Iain Glass, ahead of schedule. The company has renegotiated the purchase agreement of the Plus Bartender, Manifest Shipping and Scale, Manifest Shipping and Scale Lite and Live Picking software products to include the following:

The 5% royalty on software products shall be for three years from the original contract date, to start when sales reach \$500,000;

The 20% royalty on the sale of hardware shall be reduced to 5% of profit on hardware sales for three years from the date of the original contract;

During the three fiscal years commencing August 6 1992 the maximum combined royalty payable share not exceed \$125,000 per year;

There will be no payment to Glass upon the company reaching \$500,000 in sales;

The remaining 300,000 performance shares to be issued in three stages pursuant to the original acquisition agreement shall be distributed as follows: 1/3 to Glass; 1/6 to Derek Kellock (director and officer of the company); 1/6 to Dominik Jasper (director and officer); and 1/3 to Radvak Holdings whose principal shareholder is Steven Radvak, a director of the company; and

The consulting contract with Glass has been terminated and the scale of remuneration to Glass has been reduced.

The company has completed the acquisition of all intellectual property associated with the software products.

**News Release ... Drilling results from Ball Creek property**

Mr Dil Gujral reports

Colossal has received the results of the 1993 drill program on the Ball Creek property.

or	14.3	133.2	118.9	.107	.009

The program tested the Camp zone porphyry target much deeper than previous drill programs and core recovery was good. The drilling established a large low-grade porphyry copper gold deposit over a slope distance of roughly 600 metres and an average depth below surface of 250 metres.

If the mineralized zone extends 100 metres laterally from the drill section, a geologic resource of 80 million tons grading 0.125% copper and 0.01 oz/ton gold could be postulated to exist in this zone. Drilling with the larger diameter core (HQ size) could improve the grade.

Other large zones on the property with porphyry copper gold mineralization at surface have not been tested by drilling, and a large arsenic anomaly in soil remains to be explored.

**News Release ... Letter of intent**

Mr Dale Hoffman reports

The company has entered into a letter of intent which will result in the company being granted options to earn a 100% interest in up to 20 square kilometres of promising mining properties in a South American country.

Two small (50 ton per day) high grade gold-silver producers are presently operating on the properties, and there appears to be excellent potential to expand operations. Further details will be released as they become available.

With respect to the company's Molanosa Arch diamond project, interim results are expected to be available for release within the next three weeks.
