

Sept. 30/75

Atlin Ruffin ①

880393
Atlin 104Woll

Gene Laramy
- mine manager / Snel and Dansey

1984 - ^{Grave} Fred ^{marked} hole
White Pass

^{Hodgson} Lloyd - handyman (Smithers)

Pictures

- ① Looking NE towards
(4900) ~~5100~~ + 5600 ft.
- ② - Portal 4AA (Elev. ~~5100~~
5800)
ZnS + PbS

- Portal 2B tunnel ~ 400 ft of north
div. 5650 minor ft. vein + fn. gr.
PbS + cpy. Some fn. gr. ZnS + PbS

③ ~ 500 ft. working
4E adit [over!]

Vein Crse, gr. PbS + minor

arseno + py + cpy

Mill under
const.

(any tetra?)

Host - typical mafic am.

④
Yak ~ 42,000 tons @ 9g Ag,
System
not flow width 3-6 ft
dike

Minor po + MoS₂ + native silver (wire)
+ pyargyrite + prausite (Ag)

Veins approx. E-W steep dip ~ 80°

⑤ Pictures - Also one six-cell unit in fore.
Mill construction
with crusher above mill
for 25 ton/day

→ shows glacial, moraine also
- 3900 ft. level - Interprovincial
Silver drove in late '60's for
promotion (i.e. project veins up to
4300, etc.)

ATZIN SILVER

Aug. 24/77

Gene Laramie

Work Level 4300

Haulage 4100

4250

4210

~ 50-85 tons/day 2 shifts

- 2' chloritic gouge zones
vein 'zone' - 13 ft.

pinch + swell

20 total
on site

8 men underground

Pies. ① 4300 level

② Looking NE towards

4100 haulage + Mill-camp

mill

ball mills

2 50-ton crushers (1 broken since July)
Pb-Zn conc. (4 cells each)

~ 30 tons of Pb-Zn Concs. stored
ship to Asarco (Tulameen)
Pb conc // Zn conc not sent to where

In grade (Heads)

Zn 2%

Pb 2.5%

Ag 15.6 g/ton

Samples Taken

1) 4250 sublevel

2½-3 ft. vein in chloritic gouge
flat lying (10°)

- also grab from stockpile - 4250'

2) 4210 sublevel

- vein material

Reserves

Halved from 60,000 to
30,000 (Gene)

- running on level only!

ATLIN SILVER

Mar 29/81

- Trident Res.

- Dave King - Mine Manager
Al Greene (Quick)

- Devel. haulage - 3900' level
(mill site)

- working (pic) - 4100' level
- 4300' level

- Drive up on rd. above 4300'
level but stopped by snow

Pic. - upper levels

Spent all time this Spring re-habilitat-
ing workings which were left in
terrible shape i.e. last operation
took all they could & left timbers
every where.

- mill almost ready,

Reserves? ~ 64,000 tons @ 18.6 Ag
+ 5% (Pb+Zn)

Bill Dallis re - Yellow Jacket
claim on Pine Creek just
above falls (near Discovery)
- says "pure silver" up to
55 g/t

- showed rk. to Dutch van Vassel
= "Nevada-like" rock

- Bill trying to get old info
(maps/etc) - will go to Pr. Rupert.

John Harvey - McKee Ck.
+ partner Harvey working old hydraulic
tailings.

- figures he has 2 million yards
@ .78 g/t

→ visited May 30/81

Lloyd Hodgson - underground
placer operation on Wright Ck.
on area "never been mined"
previous testing (keystone drill) was
very good.

ATLW RUFFNER

July 31/97
Cloudy 15°C

- with Paul Wajdak
- drive to mill site (cleaned up & looks in good shape) & up to main level portal.
- drove to highest elev. level & access road in good condition.

FTLN (SILVER) RUFFNERSat July
31/99

(+Beryl)

Sun +25°C

- rd. to 'upper' levels - good

- rd. to mill - washout ~ 1 km
before mill
