Subject: Prince George Update to Feb. 2.

Issues:

Kemess: Staff meetings with MOF regarding coordination of inspection duties on the powerline. Updated MELP RD on same. Work conducted by reclamation contractors has been satisfactory. Some discussion on Terms of Reference for the Project Approval Certificate review. B. McBride working on a permit amendment. Northgate released a mineral inventory for Kemess North: 360 million tonnes @ 0.154% Cu and 0.299 g/t Au. Potential Omineca to Stewart Road remains topical.

Pine Valley Coal: Investigation has revealed that there was an air blast associated with the Jan. 17th blast at this mine. Residents of the local communities and businesses interviewed confirmed it was more than they expected. Blasting procedures submitted to MEM. Environmental monitoring and liaison meeting scheduled for Feb. 14, 2001.

FYI:

Mt. Polley: Imperial Metals has acquired 100% ownership of the Mt. Polley Mine from Sumitomo Corporation. This is good news.

Angel Jade: Major work in Manson Creek area - 100,000+ m3 planned for this year. Working with MOF to ensure that tree removal can be done on time and at a reasonable cost. Company indicates that they will hire as many locals as possible (looking at about 8 people).

Western Canadian Coal: Notices of Work that outline exploration projects have been received from Western Canadian Coal for drill programs on its West Brazion and Wolverine properties.

Eighteenth Annual Cordilleran Exploration Round-Up: Indications are that the event was attended by over 2100 delegates. For the first time in years there seemed to be a positive attitude for companies trying to raise investment capital for exploration in B.C. Several property holders in the North Central Region have indicated that they will be more aggressive during 2001 exploring their properties.

Coal: Inquiries continue to come in. Dusting off the coal mine files.

MMS: Richard Booth in PG for a couple of days and his advice was well received. Backlogs are starting to build because of learning pains and time required to enter all the data from the Notices of Work. May have to discuss priority setting and information requirements.

Subject: RE: Belcourt Coal Property

Hello Chelsea,
Sorry for the delayed reply - as usual I am trying to manage a challenging workload.

Please express my best wishes to Mr Liu and his guest from China. I am most pleased to know that Dehua is also looking at the the Belcourt properties for consideration of investing in a new mine. The coal properties in this area are different from those in the Gething project area, and the First Nations issues are still important but generally less contentious.

As you know, the Gething project licence is in good standing, and we have just approved the exploration permit. Additional information on the Belcourt area can be obtained from our Provincial Geology team and I would encourage you to contact Mr Tom Schroeter in our Vancouver office if you would like to summary of this information. Tom can be reached at (604) 660-2812, and he is familiar with the area and coal characteristics. Tom is also going to China to attend the Beijing mining conference and is successfully establishing many contacts in the Chinese mining industry.

I will verify with our Mineral Titles group the area that Dehua may be interested in the Belcourt area, to ensure the licences in question are in good standing or available for your company.

Thanks again, I wish you a pleasant trip to the Chetwynd/Tumbler Ridge area.

Sincerely,

2006-10-30

Hi Glen,

Down below is a letter drafted by Mr. Liu. I've translated into English for you.

Regards,

Chelsea

Quote

Dear Glen,

I am in Beijing right now and will be back to Vancouver on Oct 30th. On November 6th, Mr. Chonghui Zhang, the director of State owned Assets Supervision and Administration Commission who controls all the government owned coalmines in the largest coal producing province in China - Shan Xi province (annual coal output is 600 million tones), will visit Canada and Dehua, together with some key persons from coalmines in Shanxi. I shall accompany this delegation to Chetwynd and Tumbler Ridge for a mine site visit.

Under the support and assistance from Ministry of Energy and Mines, our Gething Project is going smoothly up to now. We need to do some further exploration in the area to further identify mine engineering design. We are very happy to know that our application for drilling exploration is being processed by the ministry; and once we get the permits, we shall start drilling exploration right away.

Another huge potential coal property Dehua possessed is Belcourt Coal property. The geologists believe that there is better coal resources there compared with Gething and our Geologists from China also pay a high evaluation on this property. Therefore the main target of Chinese delegation is Belcourt Property this time and they are going to visit the mine site while staying in Canada. Dehua has made the application on the tenure for extension of Belcourt area on August 31st to MEM. As there are no First Nations issues involved in this area, it our hope that Dehua can be granted the coal license earlier, so that we can conduct further geological exploration soon.

Once again, appreciate your generous support to Canadian Dehua. I am looking forward to meeting you

soon.

Best regards,

Naishun Liu

Hi Alice,

Naishun just want to update you on our project, but if possible, he would like to know about the information about coal deposit in Belcourt.

Thanks!

Dear Alice,

Naishun will still go to Victoria today and hope to meet you up. But Helvin Li will accompany Naishun instead of me.

They would be at your office between 2:30-3:00pm.

Thanks and hope seeing you next time!

Elisa
