SMITHERS, B. C.

December 10th, 1974

Mr. T. Schroeter,
District Geologist,
Box 877,
Smithers, B. C.

Greetings Tom,

Thank you for the two colour prints of Berg that you sent me.
The colour positive film is certainly superior to the Kodachrome that I
used. Could you please send me 5 additional copies of the Berg panorama
or the negative (positive?) and I'll reproduce them here. I plan to use
them in my thesis.

For your interest: The oxide crusts precipitating in the creek gave
the following results -

Cu	461 ppm
Mo	333 ppm
Fe	39.8%
S	4.6%

The limonites are amorphous.

Cheers and best wishes for a "Merry Christmas and a Happy New Year"!

Sincerely,

A. PANTELEYEV, P. Eng.,
Geologist, Geological Division,
Mineral Resources Branch
