

Feb. 9/06

BIG NIC (Cu-Ni)

- chat in Van. MOO with Murray McLaren
- Murray has acquired a large land package south, SW and W of this historic Giant Mascot mine
- Completed airborne survey in 2005 = lots of excellent targets
- MM plans work on at least 6 'prime' targets (ground IP → drilling) in '06 (now's)
- Disc. about plant (tonnes) of Giant Mascot-like massive sul. (cpy-pow[er]) ~ 3 km SW of GM mine (i.e. identical ^{type})
- also disc. more dissemin. or feeder-like sul. (cpy) elsewhere

⇒ see Rpt. + CD (confidential)

- CONF - MM has discussed project with JOGMEC (Mr. Lu)
- MM has asked Barrick re-pot. option (no answer)
 - JGS suggested MM ascertain 'exact' status of GM property, wrt MEMPR reclamation banding (JGS to set up meeting with Vic., when appropriate)
 - MM waiting for further 'response' from Mr. Lu, prior to contacting Victoria (re-above) + Barrick again
- JGS feels could be very significant!
