BLACKWATER-DAVIDSON [MI93F037]

On July 25, 1996 Bob Lane and I very briefly visited Dave Fleming, Kennco, at the Tatelkuz Lake camp. Kennco will move its camp up to the property to conduct detailed geological mapping and relog the core. [Note: a proposed drilling program was recently cancelled due to corporate cutbacks. Dave is convinced the property is underlain by a large porphyry system, as evidenced by local, intense hornfelsing and geophysical info].
