Dear Mark:

RE: SUMMARY OF MINERAL & COAL EXPLORATION IN N.W. B. C., 1984

At the very popular and well attended "OPEN HOUSE" (B.C.
Ministry of Energy, Mines & Petroleum Resources, Geological
Survey of Canada, DIAND, and B.C. & Yukon Chamber of Mines)
held in Vancouver in January 1984, the B.C. Ministry of Energy,
Mines & Petroleum Resources made available (free, no less!)
Information Circular 1984-1 entitled BRITISH COLUMBIA MINERAL
EXPLORATION REVIEW 1983. I hope you would agree that it was a
valuable and concise review of activities.

The information which I submitted was gained almost entirely
from the pertinent operators involved. Thus, again this year,
rather than rely on Form 9-10's filed with this office and
'rumours', I ask your assistance in providing me with a very
short summary of major physical work carried out by your
company on properties located within north-central and north-
western B. C. (eg. number and footage of drilling, etc.). If
you care to make some capsule comment as to the significance
of the work, both geologically and/or economically, please do
so. Any confidential information supplied will of course be
treated as such.

If you can offer any assistance in this matter, please contact
me before November 15, 1984 if possible.

Thank-you for your co-operation.

Yours truly,

Tom Schroeter
District Geologist
