Seymour

- Paul Wilton + Sheila + Ann Marie + 340c
- Colin Burge, Paul Baxter

~ 1.5 km strike length centred  
on Watershed Zone ( $\frac{1}{2}$  GVRD <sup>group</sup>)  
- headwaters of Chipper Cr. - Furry Cr.

~ 8 ddt  
- stratigraphic control (contacts)  
of dacitic pyroclastics + andesite

- Britannia shear close to contacts

1985 - drilled 6 holes on The Ro 1  
prop. - cpy in ash tuffs

- Hydracore drill (à la Debbie)

- Robert Jones - GVRD - for permission  
- apparently good access up from  
Seymour Demonstration Forest

Sulphide Fragment Breccia  
present

(Eg. at Maggie - same 'unit'  
at contact of bio-coarctite  
alt'd and psite + overlying  
Slumach rhyolite.)

C.B. - analogy with HW (Sicke  
strat.)

- would prefer to see more sediment  
(i.e. argillites) à la Britannia Mike

Britannia Shear? - not sure why

- good proximal sequence of volcs.  
with little in way of marker beds  
(à la Mt. St. Helens dome)

- pyritic-rich 'muds' unit sometimes  
assoc. with exhalative unit

U/G at FAIRWEST SHOWING

~50m, then x-cut

- excellent exposure of Britannia Shear

- dacite lapilli tuffs (frags. stretched out) <sup>2m</sup>  
+ ands. ash tuffs.
