Dan, thanks very much for the quick response. I will call you around 9pm tonight. I plan to catch the 7:45am ferry from Tsawwassen to Duke Point tomorrow, so I should be in Campbell River by noonish? I will have my wife with me; so will drop her in town for the afternoon, prior to heading top Port Hardy later in the day.

Tom

Hi Tom,

I will be touring Cliff Rennie and Jacques Houle on the Camp Lake Project today - and Jacques again tomorrow. You will need a 4x4 and a key to the gate (which Hancock Logging installed two weeks ago) in order to access the property. Someone in government has told the logging companies if they allow access to the public, they could be responsible for the full cost of fighting any forest fires. So ---after fighting for years to get these areas opened up so that they can be prospected -- they are being closed again. If you phone me tonight -- say 9:00 pm-- I would be happy to make arrangements to meet you where the Berry Creek Main leaves Highway 28. You could accompany Jacques and I to the main Camp Lake showing Thursday afternoon. I look forward to hearing from you.

Cheers,
 Dan

Hi, Dan. Thanks for including me in the info. I'm hoping to join the Vancouver Island Exploration Group field trip to northern Vancouver Island this coming Friday (flying back to Van. from Smithers tonight); Was wondering if there was any chance of visiting your Camp Lake discovery (either on Saturday, or on

Thursday afternoon)? If so, could you FAX (or email?) me a map of how to access the property, assuming it doesn't require 4-wheel drive. Sorry for the short notice. I will be in my Vancouver office tomorrow all day (Fax: 604-775-0313; phone 604-660-2812). Cheers, Tom.

Tich tich tich Ken,

This prospect is located on private forest land - which being harvested for the second time around. Logging roads everywhere and they are gated. What's more, the community of Campbell River is passionately supportive of mining - and has suffered enough from a lack of jobs and a nearly destroyed economy.... no thanks in part to a criminally manipulated (so called) land use planning process (remember CORE?). Thanks to Suzuki's and Green Peace's campaign against fish farming - they enjoy absolutely no support here. Its time to start being positive.

Gentlemen,

There isn't any dispute as to the grade of that sample, the primary concern is tonnage. I hope that it isn't situated within a thousand miles, oops pardon me, kilometres of a Vancouver Island Marmot feeding area and there aren't any streams on the property that might eventually drain into a "fish-bearing" stream! Now that the information has been sent twice "round the world", Green Peace, the Suzuki Foundation and other GWs have been alerted and are sure to begin another campaign to create a park over the entire area. I am not a cynic!

Dont be picky Dan. Since you didnt quote tons and grade and since that specimen could be sold for more than the cost of extracting it there is a case for technically describing it as "ore". Besides that I forwarded it and it may have gone halfway round the world by now, so live with it.

Cheers, Cliff

I think one new discovery that missed the newswires was MinLand's Camp Lake Cu-Au-Magnetite project near Campbell River, since optioned by Better Resources. I did a 43-101 report on it, and it looks really interesting.

Thanks for the update, Jacques. Too bad about the \$\$\$\$, but more good work should change that. As for the SEG Newsletter - yes, it's a BIG chore (but I saw/see it as a great opportunity to profile/promote BC). It does cover all the western Provinces and Territories - so space is/will be very limited. My first contribution is at the end of this month - it's way over length guidelines; however, I'm suggesting it's a "Catch-Up" review. In any event, by all means keep me informed of things.

Subject: Money Tree Fruitless, and SEG Regional Update

Hi Tom,

We had no luck with the money tree last week; the concensus amongst brokers is that SYMC needs to do more technical work on the ground. So, Herb and Sy are prospecting the Bowl Zone in preparation for a tentative visit by me next Friday. Myra Falls is also sending a geologist to visit and assess the Dauntless and Macktush properties.

I read in the SEG newsletter that you are taking over Ted Trueman's former regional correspondence column for Western Canada. That is fantastic news, and it will be a pleasure to read about B.C. news again. If and when you need any input from Vancouver Island projects, just send me a note and I will
