October 23, 1997

"BLF - ASE" \$0.43

INFORMATION RELEASE

The Company is pleased to announce current developments on The Caramelia (B.C.), Love Project (Lincoln, Montana) properties and in corporate financing:

LCP'S
PROPERTY!

The Company has completed arrangements for its "flow through" share offering of 1,200,000 shares @ \$0.37/share with a 1/2 warrant exercisable at \$0.60 for 18 months from October 31 closing. The funds will be used for a drill program on the Caramelia Gold Project near Rock Creek, British Columbia, under the supervision of P.A. van Angeren, P.Geol., in consultation with R.E. Miller, P.Geol.. Drilling will commence in 30 days as permits are finalized, and final target selection completed. Approximately 1500 meters of core drilling are proposed, in 6 - 10 holes.

Can
Mex 2/2/97

Existing drill permits for the Love Project at Lincoln, Montana are being expanded to include 3 holes on adjacent Bureau of Land Management claims for geological information and to increase proven and probable reserves from 200,000 ounces + to 300,000 ounces Au. The holes will be spotted and sites inspected in the 27th - 31st October, 1997 period. The permit bond is already in place, and drilling is projected to commence before the end of November, on the Big Blackfoot patented claim group, and the B.L.M. claims adjacent thereto.

The Company is always focused on gold prices, and notes that the price of gold in Canadian dollars has been very stable at \$450/oz , for the last few months. Variations in both U.S. dollar price and Canadian dollar U.S. exchange rate have compensated to balance gold market rates, evening the Canadian dollar gold price to acceptable economic levels for the Company's three gold projects and their known contained reserves.

Negotiations continue apace on major financing for the Montana Love Project, as previously reported, with I.B.K. Capital Corp. of Toronto, Canada.

Additional information will be provided as available.

SPECIAL REPORT TO PATRICK TURNER, PUBLISHER, OSOYOOS TIMES

BOUNDARY GOLDFIELDS EXPLORATION WILL BE BOON FOR OSOYOOS AREA

Vancouver (B.C.) -- A aggregate of \$1.15 million in mineral exploration and metallurgy will be invested in the historic Boundary Gold Fields near Rock Creek by Gold City Mining Corporation's three joint venture participants this summer.

Gold City's 2,200-hectare Caramelia gold Project, located at famous Camp McKinney, which produced 82,000 ounces of gold from B.C.'s first dividend paying lode gold mine (Cariboo-Amelia), will be the site of \$250 thousand in diamond drilling by its 50% co-venturer, Big Blackfoot Resources Ltd.

Gold City's 2,100-hectare Old Nick claims at Rock Creek, reported to be the province's largest nickel and cobalt deposit, will feature \$750 thousand of exploration and metallurgical testing by its co-venturer, Applied Mine Technologies Inc.

Also, surface exploration will be conducted in 1997 on the large, 4,300-hectare Rock Creek Gold Trend Joint Venture project by one of Gold City's co-venturers, First Point Minerals Corp. Rock Creek Gold Trend JV controls mineral lands near Bridesville at the International Boundary, just eight kilometres northwest of Battle Mountain Gold Company's Crown Jewel deposit which contains 1.8 million ounces of gold .

"What does this mean to the Southern Interior economically?" queries Gold City President, John Chapman. "Traditionally, 40 to 60 per cent of the necessary work force of mineral exploration comes from the local communities... approximately 30 people will be directly employed in the three, 1997 projects."

Gold City is uniquely committed to mineral development in the stable British Columbia market. The company will soon begin exploration on its extensive Welbar and Domin gold properties near historic Wells and Barkerville; (15,450 hectares, largest single land position ever held by one company in the famous Cariboo Gold Fields).

"We believe there is a shift in focus from resource properties in third world countries back to North America," comments Chapman. "There is an awful lot to be said for Canada's political and economic stability."

more...

2... BOUNDARY GOLD FIELDS...

Gold City's team of management, directors and major shareholders are the same people who developed Western Canada's only new mine in 1993 -- the 1,500 tpd Keyston Gold project at Lynn Lake, Manitoba (Cazador & Granduc). The mine has now been operating successfully for more than three years and has made a considerable and positive impact on the Northern Manitoba economy.

(Caramelia)**NEWS RELEASE**

April 17, 1998

FOR IMMEDIATE RELEASE

**PROGRESS REPORT
CAMELIA & OLD NICK PROJECTS, BRITISH COLUMBIA**

Management is pleased to report progress on two of its Southern, British Columbia projects which are under option to other companies. Big Blackfoot Resources Ltd. (BLF:ASE) has reported drilling results and 1998 exploration plans at the Caramelia gold project and AM Technologies Limited (APL:ASE) has reported its 1998/99 exploration and development plans for the Old Nick nickel and cobalt project.

The drilling of seven core holes (520 meters) along 1.5 kilometers of the northerly Caramelia vein system and 150 meters of the Anarchist vein system at Camp McKinney was successful in determining geologic structures and related gold bearing veins as planned. While no economic grades were intersected, six of the holes did return anomalous gold values up to 1.4 grams per tonne. Hole DD9806 penetrated 7.0 meters grading 0.3 gpt gold, 16.6 gpt silver, 0.41% lead and 0.55% zinc in an intensely silicified stockwork near the Fontenoy fault, which is an interesting mode of mineralization that is very different than the normal veins. Big Blackfoot has advised Gold City that it is planning a \$750,000 follow up drilling and trenching program later in 1998.

AM Technologies has reported to Gold City that, "the company intends to undertake a field trial by building and loading a 10,000 tonne bio heap leach pad and leaching nickel and cobalt material to recover values by the solvent extraction electrowinning process. This will enable, in a full size plant, the production of high purity cathode nickel on-site in a marketable form if the trials are successful. The completion of this work will enable the company to complete a prefeasibility study."

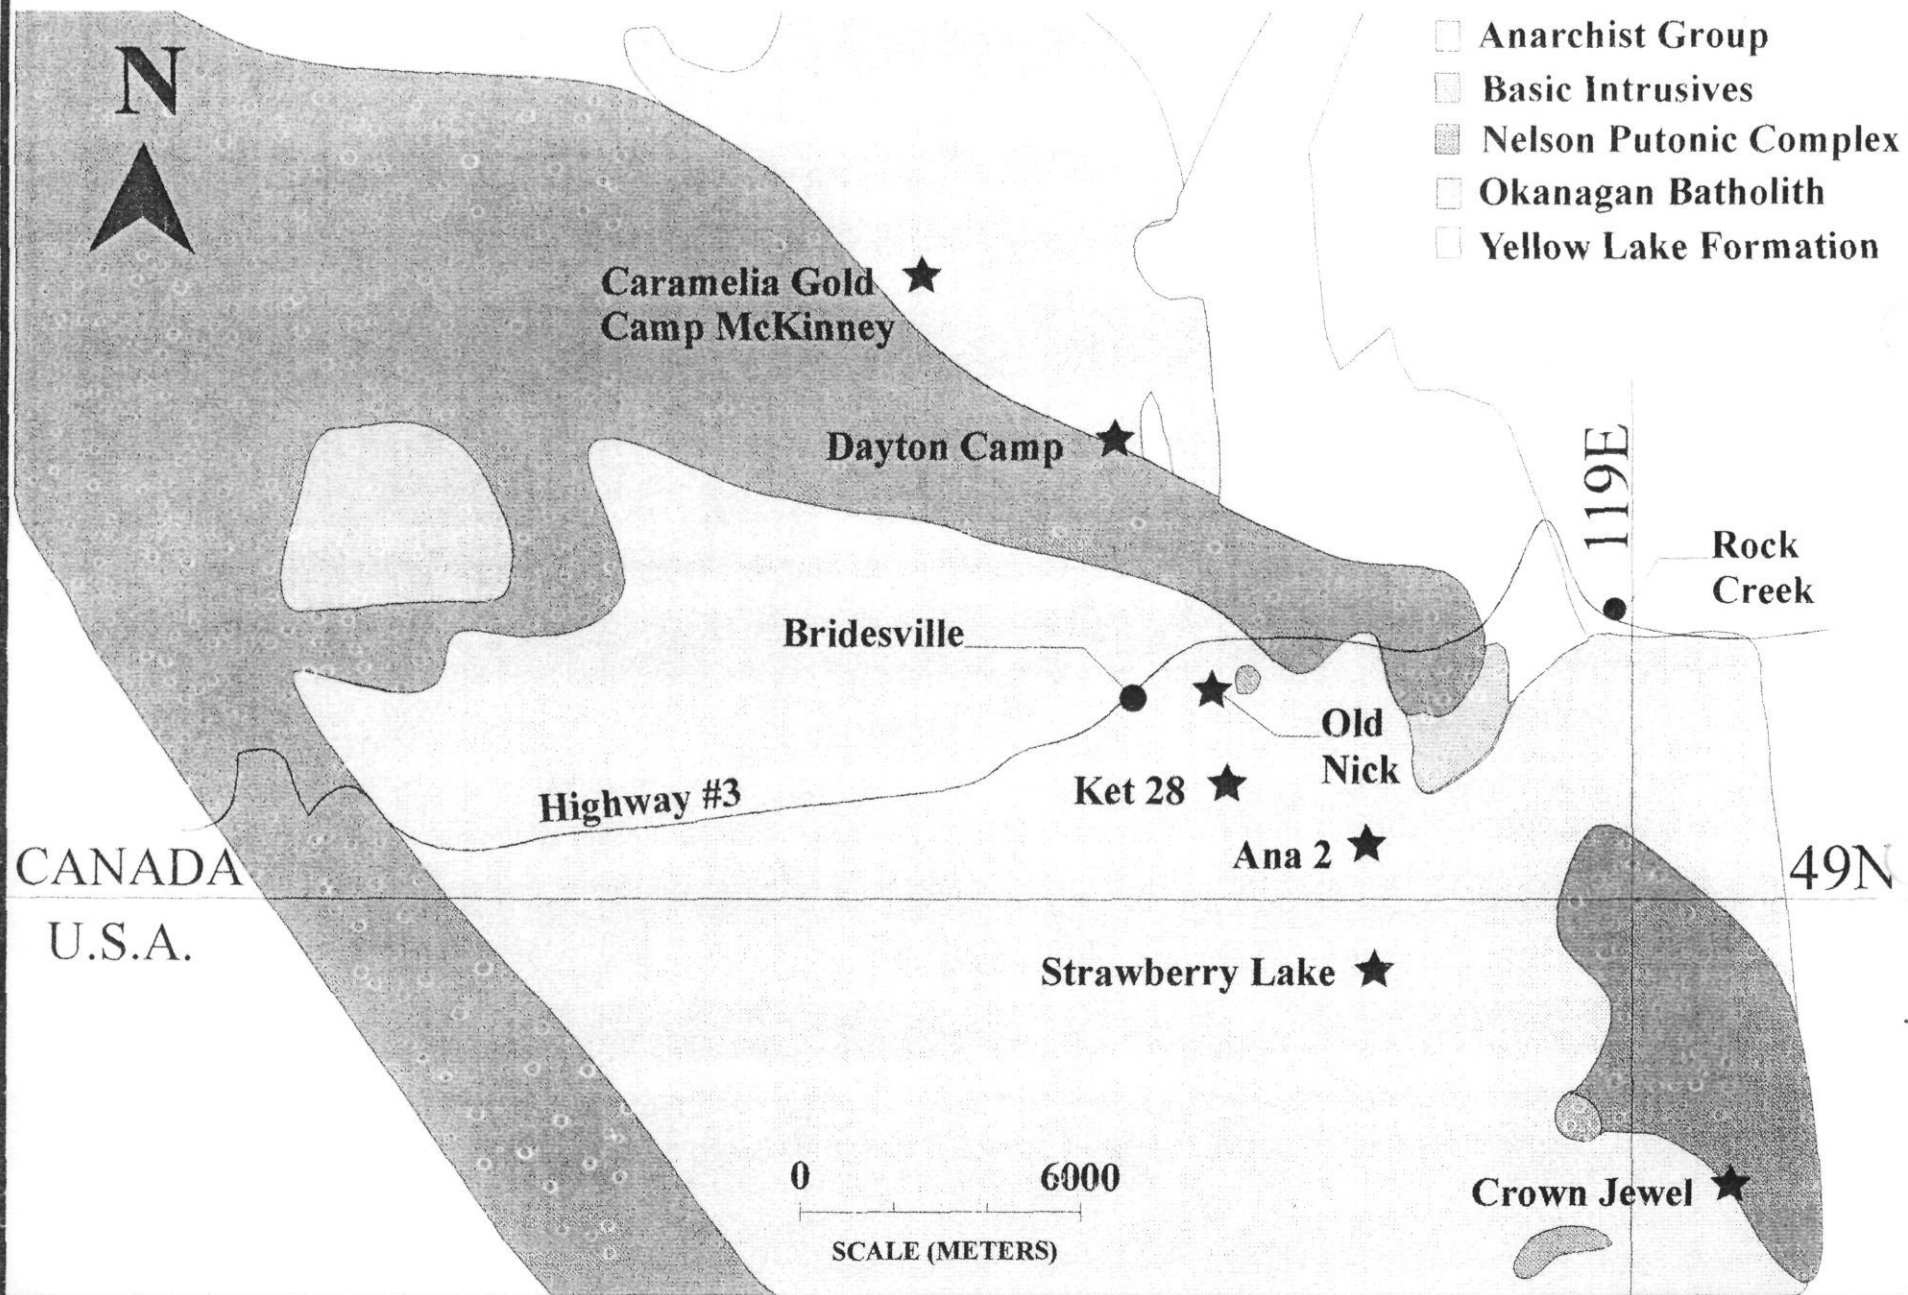

The Old Nick and Caramelia projects are located in the Boundary gold fields near Bridesville, British Columbia and are situated near the contact of Anarchist Group and Nelson Plutonic Complex rocks which also host Battle Mountain Gold Company's 1.8 million ounce Crown Jewel lode gold deposit just across the International Boundary to the south-east. The historic placer gold producing Rock Creek drains the project area.

JOINT NEWS RELEASE

January 23, 1997

FOR IMMEDIATE RELEASE

**LETTER OF INTENT
CAMELIA GOLD PROJECT, CAMP MCKINNEY, BRITISH COLUMBIA**

Vancouver, B.C.: John Chapman, President, Gold City Mining Corporation and Paul White, President of Big Blackfoot Resources Ltd. are pleased to report that a Letter of Intent has been signed on Gold City's Caramelia Gold project. Big Blackfoot will have an option to earn up to a 50% Joint Venture interest in the Project by conducting \$815,000 in mineral exploration over the next four years, and by paying Gold City \$105,000 in cash and 200,000 Common shares of Big Blackfoot, over the same period.

The Project consists of 2,200 hectares of contiguous mineral lands located at Camp McKinney and Dayton Camp near the International Boundary in South Central British Columbia, and just 20 kilometres northwest of Battle Mountain Gold Company's 1.8 million ounce Crown Jewel gold deposit.

The Project area has been a focus of gold exploration since the 1860's. The historical Rock Creek placer gold fields, are located adjacent to the Project's lode mineral lands. The Cariboo-Amelia mine, which is a part of the Project, is British Columbia's first dividend paying lode gold mine. The mine commenced underground operations in 1894 and produced 137,000 tons yielding 82,000 ounces of recovered gold. The area geology is very favorable toward discovery of more gold deposits, as seven kilometers of contact between the Anarchist Group metasediments/metavolcanics with Nelson Plutonic Complex felsic intrusives strike northwesterly across the Project lands. This is the same rock contact that hosts the Crown Jewel gold deposit and the new Ket 28 gold discovery 10 kilometers south of the Caramelia Gold project.

Big Blackfoot is planning a \$250,000 diamond drill program for the Project in 1997, to test established targets and to test extensions of known gold deposits.

The Option Agreement will be subject to the approval of independent members of each companies' Board of Directors (Paul White is President of Big Blackfoot and a Director of Gold City) and the approval of regulatory authorities.

FOR IMMEDIATE RELEASE

SHAREHOLDER APPROVAL OF AMALGAMATION

Vancouver, B.C....Management of each of Gold City Resources Inc., McKinney Mines Corp. (a private B.C. corporation), and Providence Industries Inc. are pleased to announce that the shareholders of each company at Extraordinary General Meetings held today, have approved the amalgamation of the three companies to form **GOLD CITY MINING CORPORATION.**

Unanimous approval of the Amalgamation Special Resolution was as follows:

- Providence Industries Inc: 14 shareholders representing 64.8 % of total issued shares voted in favour, none opposed.
- Gold City Resources Inc: 24 shareholders representing 65.8 % of total issued shares voted in favour, none opposed.
- McKinney Mines Corp: 24 shareholders representing 88.4 % of total issued shares voted in favour, none opposed.

The Amalgamation will become effective as soon as possible following approval of each of: the Supreme Court of B.C.; the Registrar of Companies of B.C.; and the Vancouver and Alberta Stock Exchanges — tentatively in the first week of November, 1994.

Upon amalgamation, one share of the Amalgamated Company will be issued for each: 0.8 of one Providence share; each one Gold City share; and, each 1.3 McKinney Mines shares. Common shares of Gold City Mining Corporation will trade on both of the Vancouver and Alberta Stock Exchanges.

NEWS RELEASE

AUGUST 16, 1994
FOR IMMEDIATE RELEASE

PROPOSED AMALGAMATION

Vancouver, B.C....Mr. John Chapman, President and CEO of Gold City Resources Inc. and McKinney Mines Corp.(a private B.C. corporation), and Mr. Alan Campbell, President of Providence Industries Inc. today announce that all three companies have agreed to amalgamate. The amalgamation is subject to Board, Shareholder, Regulatory, and Court approval. Providence will join the amalgamation that Gold City and McKinney previously announced on July 8, 1994.

McKinney and Gold City have significant mineral exploration properties in the Rock Creek area of south central B.C. and share a common management team which has been successful in the development of mining properties in Western Canada. Providence, which recently sold its distribution business in the US, has been actively seeking an opportunity to re-enter the mineral exploration business. With approximately \$500,000 in cash and ability to raise further funds Providence is able to significantly contribute to a worthy exploration program. The management of all three companies believe that an amalgamation at this time will result in a technically strong, well financed new entity with a substantial mineral property portfolio.

The share conversion ratio to be used between the three companies and the new amalgamated company will be based on a fairness opinion rendered by an independent valuator.

Subject to regulatory approval, Providence will advance to Gold City \$100,000 by way of a short term loan to assist Gold City with property acquisitions, exploration costs and general operating capital.

NEWS RELEASE

JULY 8, 1994

FOR IMMEDIATE RELEASE

PROPOSED AMALGAMATION

Vancouver, B.C.... Mr. John A. Chapman, President & C.E.O. today announces that Gold City and McKinney Mines Corp., a private B.C. Company, have agreed to amalgamate. The amalgamation will be subject to Board, Shareholder and court approval.

Management of Gold City and McKinney have determined that the proposed amalgamated company will be technically and financially stronger than the separate entities. Both Gold City and McKinney have significant mineral property interests in the Osoyoos - Greenwood area of British Columbia - development of which will benefit from common ownership and financing.

Gold City and McKinney have overlapping directors and management. McKinney currently holds 19.2% of Gold City, and has options to purchase 1.5 million shares. Inter-company shareholdings will be cancelled upon amalgamation.

Gold City and McKinney have jointly commissioned an independent valuator to determine the fairness of the transaction and in particular the share exchange ratio for shares of each of Gold City and McKinney to shares in the amalgamated company. A further announcement will be made upon Board approval of the independent advisor's report.

FOR IMMEDIATE RELEASE

DRILLING RESULTS MIDWAY PROJECT

Vancouver, B.C. John A. Chapman, President, announces that results have been received from recent diamond drilling by Phoenix Gold Resources Ltd. (formerly Greenwood Gold Inc.) on their 51% earn-in on Gold City's Midway Project. Hole, 94-RM1-2C, has intercepted, near surface, 3.35 meters (11.0 feet) grading 52.1 grams gold per metric tonne (1.52 ounces of gold per ton). This hole is located on the Ket 28 mineral claim, south of Camp McKinney, near Rock Creek, B.C.

A complete listing of drill results, and an associated property map, are being prepared and should be available within two weeks.
