

881612

CARIBOU CREEK, Yukon

(Doran Gold)
Apr. 12/89

- office chat with Jim Wallis

- 'Beautiful' cut + polished slabs of high grade gold ore

- 'lacework' gold (along grain boundaries) in qtz.

- only native gold!
(no other sulphides)
i.e. high level epithermal!

- Great potential!

- Si'lica + Au may have totally replaced carbonate-carbonaceous units
