

NEEDLEPOINT MTN. Area

Dec. 15/87

- claims west of Cusac Mine held by Gulf Titanium
- talk with Ol' Brett + sons David + Danny (Teetop)
- also met Marty - Alaskan gold placers

- trenching on Au-As soil anomalies showed 'chert' or silicified breccia in a shear zone with andesite apparently overlying.
- Tread area = poor outcrop below 'knob'
- Perhaps need percussion rig?
