## DOUBLESTAR HALTS DRILLING PROGRAM ON CATFACE COPPER

September 26, 2006

VANCOUVER, British Columbia – Doublestar Resources Ltd (DSR-TSXV) has cancelled the exploratory drill program on its Catface copper property on the west coast of Vancouver Island pending an Ahousaht First Nation referendum on the project.

At a meeting held on Monday, September 25th, Ahousaht hereditary chiefs advised that they were opposed to the drill program and objected to the presence of the Company in the village of Ahousaht and on Catface Mountain. The Company had earlier been invited to base the drilling program in Ahousaht, and had arranged employment of seven Ahousaht band members.

Up until yesterday's meeting, the Company has had a cordial relationship with the Ahousaht First Nation, with whom it has been consulting on the project for six years. During that time, hydrological evaluations of the waters draining Catface Mountain have indicated that the geochemical system is alkaline rather than acidic and that there is a low presence of metals in solution in these waters.

The work program was designed as a low-impact, helicopter-mounted program that was, primarily, of a scientific and technical nature while secondarily an exploration program. The program would have enabled the Company to qualify the two principal environmental issues of mining: the tendency of rocks being mined to or not to generate acid and the tendency of rocks being mined to or not to leach metals into solution.

Doublestar holds work permit #MX-8-238 covering 3,000 metres of diamond drilling on the Mining Lease and mineral claims that comprise the project. However, out of respect for the Ahousaht community and people, the Company will await the results of the proposed referendum to be held at their Annual General Meeting tentatively scheduled for November 22 – 24, 2006.

### ***About Doublestar Resources***

Doublestar Resources Ltd. is a Canadian mineral resource company and leading owner and developer of advanced and grass roots precious and base metal and industrial mineral properties. The Company seeks to create solid shareholder returns in an environmentally responsible fashion to benefit future generations. For more details, call Doublestar Investor Relations at 604 688-7377, or visit Doublestar on the web at [www.doublestar.net](http://www.doublestar.net).

### Doublestar Resources to Drill Catface Copper Deposit

June 9, 2006

Vancouver, British Columbia – Doublestar Resources Ltd (TSX-V:DSR) will commence a diamond drilling program at its Catface porphyry copper property located on Catface Peninsula, 13 km northwest of Tofino, on the West Coast of Vancouver Island, in September 2006.

“Our goal with this program is to confirm and better qualify the copper property’s historic indicated resource,” says Alan Savage, CEO and president of Doublestar. “We strongly believe, however, that the size of the deposit can be expanded with follow-on drilling.”

The property contains a historic indicated resource of 169 million tonnes grading 0.43% copper (at a 0.30% copper cutoff) and 0.014% molybdenum disulphide (SRK, 1990). Past drilling totals 20,600 metres with the majority of it radiating from an 857 metre adit driven through the core of the deposit.

The program, which has been permitted, is comprised of up to 3,000 metres of NQ diamond drilling in 10 holes that will be assayed for copper, molybdenum, silver, gold and ~~rhodium~~. The drilling will also provide material for metallurgical analysis and testing of the environmental geochemistry of the mineralization, waste rock and tailings. The program will include holes to confirm historic drill results, to infill between prior drill holes, and to explore un-drilled target areas such as the Hecate Bay anomaly.

Doublestar has contracted with Beaupre Diamond Drilling Ltd. to conduct this drilling program from helicopter serviced pads so no road construction or reactivation is needed. The program will be led by Paul D. Gray, P.Geol., Vice President, Exploration of Doublestar and the Qualified Person for the program.

Tom,

Please find attached a DRAFT (albeit close to final form) Agenda for today's meeting.

I have sent this to you as a hardcopy along with an SRK Project description (so you can brush up on the project should you wish).

Stay tuned for those materials to come through your door within a half an hour.

Call me if you need anything else or any clarification

See you this afternoon, . 2pm at Bull, Houser, Tupper Offices. 30th floor Board room.

## **DRAFT AGENDA**

### **FOR**

### **APRIL 25, 2006 MEETING BETWEEN THE AHOUSAHT FIRST NATION AND CATFACE COPPER MINES LIMITED**

---

**Prayer** As this meeting is of great importance to both Ahousaht and CCML, it is proposed that the meeting start with an Ahousaht prayer for cooperation and understanding between the Nation and the Corporation.

#### **Opening statements:**

Ahousaht statement of their fifty-year vision going forward for the communities of Ahousaht/Marktosis

Company statement of their vision for their operations at Chetaapi

#### **Company then delivers a prepared statement made up of,**

1. A review of consultation with Ahousaht and of the project having regard for its scope and its significance to the Ahousaht Community
2. A review of how the Company proposes to come together with the Community for the benefit of both
3. A review of the risks to the Company, Ahousaht and the project
4. A review of the Protocol Agreement and what will follow on its signing

#### **Discussion**

Wide open to any and all aspects of the project including social, cultural and economic matters

#### **Targeted Result**

The signing of the Protocol Agreement

**Set date for next meeting, which will be to establish the Ahousaht committees that will work with the Company during the life of the Protocol Agreement**

**End**

## **IN ATTENDANCE**

### **For Ahousaht:**

The Ahousaht Hereditary Chiefs (Will Shawn Atleo be attending?)  
Elected Chief Keith Atleo  
Speakers

### **For the Company:**

One Directors (Alan Savage)  
Two Officers (President, Alan Savage; V. P. Exploration, Paul Gray)

### **Guest (Government):**

Tom Schroeter, Senior Regional Geologist, Geological Survey Branch

## **LOCATION**

Offices of Bull, Housser & Tupper  
3000 Royal Centre  
1055 West Georgia Street  
Vancouver, BC

## **DATE AND TIME**

April 25, 2006 at 2:00 p.m.

Tom:

A bit of a heads up for you. I was part of a meeting yesterday (with Fred Herman and Norm Marcy) with representatives of the Ahousat Band. They have been approached by Doublestar to investigate the possibility of some sort of partnership or strategic alliance to enable work to restart on the Catface. The band was looking for information about the deposit and also about the process for project review/mine review, possible environmental impacts, etc.

I gave them all the information I could dig up (MINFILE plus the papers in the 2 CIM porphyry volumes) plus I briefly showed them how to access the Map Place, etc. I also mentioned your name as I'm certain that you would have visited the property when it was last active. You can probably expect a call or office visit from Mike Bonshor of Visions First Nations Planning Group. They seem very interested in the economic opportunity that Catface presents, though they quite rightly want to be as aware as possible of the potential pitfalls. We suggested that they might talk to the Tahtlan (Eskay Creek) and other groups that are already involved with mining to get their perspectives. An encouraging sign and a definite plus for Doublestar to start the ball rolling.

Nick
