Dear Tom;

I certainly appreciate the photos taken at the CH property, the clarity is excellent and the suite is well represented. I have learned quite a bit in the last two months and I certainly want to thank you and Bob for your input. Although we did not find a mine with this initial program we are optimistic for the potential in this area.

I was uncertain about sampling a large section of core for age dating in the initial phase. After all preliminary studies have been completed I will submit the least altered intrusive to you.

Best of luck in the upcoming hockey season.

Sincerely,
Placer Dome Inc.

Randy MacGillivray
Geologist
