Lorne and his son (?) staked this property on the 30th of December. They put 4 2-posters on the property. They stayed overnight and it took them approximately 2 hours to travel the 500 meters!

Good on them. They have an excellent property.

Seeing we are into stories, this occurred yesterday.

I was going to the GSC Library on the 15th Floor, but at the time I forgot which floor it was on. I pressed 14 and once there I realized my mistake. Just before going back down to the GSC Bookshop to get the correct floor, a gentleman appeared around the corner of the 14th floor. The plate opposite the elevators said : "Natural Resources of Canada, Geological Survey of Canada". I asked the gentleman for the correct floor. He did not know where the library was or if it was in this building. I asked him if he was with the GSC.

He answered "Yes".

See you in the trenches.

Dick
