Dear Mr. Schroeter:

**Re: Cirque Lead/Zinc/Silver Project - Stage 1 Submission (January, 1991)**

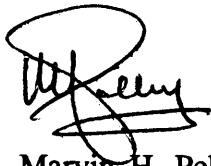

Please find attached for your review and comment, a copy of the Cirque Lead/Zinc/Silver Project - Stage 1 Submission, prepared by Rescan Environmental Services for Curragh Resources Inc. This report addresses issues raised by government agencies and other participants in the Mine Development Review Process (MDRP) during the review of the company's July, 1989 Prospectus review. At the conclusion of that review, the Mine Development Steering Committee (MDSC) advised Curragh that the coordination of our company's Stage 1 submission review may be handled by the Mine Development Steering Committee. As such, the MDSC has provided Curragh with a list identifying the MDRP agencies, local governments, Native groups and public libraries to receive the Stage 1 submission.

Mr. Norman Ringstad, Chairman, Mine Development Steering Committee, will shortly follow-up with a memo to MDRP agencies which outlines review questions and identifies a review deadline. Curragh would appreciate any efforts, within reason, to expedite the review and approval of the Cirque project based on the Stage 1 submission. We are prepared to meet with key MDRP agencies to gain a preview of Stage 1 review comments, particularly those which may indicate that additional information is to be provided. We will work with Mr. Ringstad, to establish a mutually convenient meeting date once the Stage 1 submission has been distributed, and MDRP agencies have had an opportunity to conduct a preliminary review.
