CLISBAKO
 Sanders Geophysics Limited, under contract to the GSC, completed flying of the Clisbako River area in September, 1993. The area flown included all or parts of NTS 93C/16SE, C/9NE, 93B/12NW and B/13SW (a total of 1000 line kms). This survey was flown with the contractors helicopter-borne AGRS system at a line spacing of 500 metres and included total field magnetometer and VLF-EM.

Compilation of survey results is in progress and will be released as a GSC Open File booklets of colour contour and profile maps accompanied by stacked profiles of line data. Digital data will also be available at the time of the Open File releases.

During the period September 20 to October 12, 1993, R.B.K. Shives and S.B. Ballantyne, both of the GSC, will be conducting orientation follow-up studies in these and other areas. Preliminary results should be available for presentation as posters and/or oral presentations at the Vancouver Geology and Exploration Roundup and the GSC Minerals Colloquium in January, 1994. Previous results completed during fiscal 1992-93 were presented as a poster display at Bathurst '93, the annual CIMM meeting held in Bathurst, New Brunswick from Sept. 9-14, 1993.

C1.117 Coordination - Interior Plateau (P. van der Heyden, CD)

During the report period, P. van der Heyden (GSC) completed the following:

- 1) Coordinated planning and budgets for the projects within the GSC's Interior Plateau Subprogram;
- 2) Provided liaison between GSC divisions, British Columbia Ministry of Energy, Mines and Petroleum Resources (BCMEMP) officials and scientists, the GSC's Federal Provincial/Territorial Liaison Office (FPTLO), and industry representatives.
- 3) In conjunction with other Interior Plateau subprogram project leaders, completed the preparation of a GSC Current Research overview paper describing preliminary results for the Interior Plateau Subprogram.

Outputs:

van der Heyden, P., Shives, R., Ballantyne, B., Harris, D., Dunn, C., Teskey, D., Plouffe, A., and Hickson, C.

1993: Overview and preliminary results for the Interior Plateau Program, Canada-British Columbia Agreement on Mineral Development 1991-1995; in Current Research, Part E; Geological Survey of Canada, Paper 93-1E, p. 73-79.

Sept. '93 - GSC
