Attention: Mr. K. E. Robinson, P.Eng.
Executive Manager

Dear Sir:

**Re: Congress Property, Lillooet Mining Division
Prospectus for Mine Development**

I have reviewed the preliminary copy of the above prospectus and make the following recommendations for inclusion.

1. An improved fold out topographic contour map showing proposed development locations on a larger scale.
2. Any possible amplification of the extraction process and concentrations of As, Sb in products.

In view of the presence of As, Sb in the ore mineralization and the carcinogenic nature of their trioxides the proposal appears to be subject to the Mine Development Review Process. Please contact Raymond Crook at 387-3787 for further advice.

Yours very truly,

F.J.T. Hancock, P.Eng.
Inspector of Mines and Resident Engineer
