

881990

COPPER CANYON Sat. Aug 7/09

Sunny + 25°C
Previous: 21 Holes

- with Paul Wajdak
- Bruce Off

90-2 - Best hole ~ 1000' depth
 eq. > 4% Cu (1-2% Cu at)

04-22 First Hole - local 10m of 10% cpy
 - lower Cu ^{nicer} gold
 (don't have assays back yet for other hole)

Total 8 holes (on #6 row)

R. D. PENHAL LTD. MADE IN VANCOUVER CANADA
DUKSBAK WATERPROOF

- 'system' dips to NW (4.4-55°)
 - ab. gypsum being (cf. previous drilling was to NW)

04-23: 1200 ft. deep - good cpy
 ab. fluorite pseudoleucite eq. 1170-180m very good
 minor pseudoleucite homogeneous dissemin cpy.
 (minor frac.)

- intrusion came in & stewed in its
 own juices (BO) Host: intrusive
 - upward sloping of frags breccia

04-27 610 - 900m (> 300m) of
 good Cu!

- has lots of pseudoleucite
 + magnetite
 04-26 1380 ft. ^{gt garnet}

04-25 "Excellent hole"

Overall - could be much larger area - to
 incl. area to East

Hike around property with Bruce Off
(beautiful day!)
- end - pick up at Cons. Rhodes core

Photo: Core '04-25-220 m
- good cpy in syenite

Photo '04-25-208-215 m

+ minor purple fluorite in veinlet
+ dissem.
- excellent looking cpy

- no staurolite or veins - more
infilling of breccia matrix + fr. gr.
dissem. in syenite

BO believes CC min. same as
Bountiful zone @ south end
of main zone @ Galore Ck.

[Equiv. of 12-person camp]
