

## COPPER CREEK

Dec. 20/04

9-10am

- 'Show + Tell' with: Don Barker, David Dupre + Jeff Gold (CEO)  $\Rightarrow$  See: Handout
- DK 'Oxide' zone: est. 5-10 Mt e. 6% Cu  
     (target) + 4 g/t Au  
      $\rightarrow$  ~ 75% Cu leachable (not sure of Au recoveries - probably using cyanide?)
- Winter 2005 Program: raised ~ \$400k to conduct 2000-m diamond drilling (NQ) program on DK zone (probably fill-in + increase resource).
- Old airborne geophysics data clearly identifies mag 'highs' - most of which Kennecott tested (1 hole or more) - but lots more follow-up (even - re-do airborne survey with more up-to-date, sophisticated equipment) e.g. help look for sulphide material, cf. oxide
- Frested feel they are looking at a 'stand alone' project (e.g. \$50M cap cost to put rel. small Cu-(±Au) leach facility into production.

COPPER CREEK

COPPER CK.

Nov. 17/04  
 Chat with Mark Rebagliati (H&D)  
 - Min. 'totally' assoc. with ~100m wide dyke  
 in very little zone outside  
 = limited tonnage + grade  
 pot. for best grades  
 ~.5% Cu + 0.4 Au

Mar. 9/04  
 Aur Res. (Don Dudek)  
 'interested' in property  
 (wandered about 'quality' of soil geochem. data)

Apr. 4/03  
 Owners = Adam Travis + Don Barker + Dave Mehner  
 (Dave Dupré - Mgr.)  
 → FIRESTEEL Res.
