Subject: SOUTHWESTERN REGION MONTHLY REPORT: NOVEMBER I

EXPLORATION:

Santana (new)
- MDH Holdings Ltd has optioned the Santana property, an interesting copper skarn deposit perilously near Main Lakes Provincial Park in the Quadra Island LIA. Company for Network One Holdings as any rate.

Copper Rd
- Network One Holdings has started work on Quadra Island. It is currently doing grid work but it intends to reopen the access road to the Copper Road deposit later in the year.

- White Hawk Ventures Inc. processed 894 tonnes of ore from the Debbie 900 zone at the Bow Mine's mill near Greenwood and shipped 7,477.5 Kilograms of concentrate to Cominco for refining. The company has (subject to conditions) optioned 50% of the Debbie property to Cherat Mining Corp. The latter must spend \$750,000 on exploration over three years to earn its interest. There were mutterings about Cherat's involvement last spring but nothing came of it at that time.

- First Choice Industries Ltd. drilled 20 holes at Knob Hill this summer testing a large, coincident, Au-As soil geochemical and strong IP chargeability geophysical anomaly with disappointing results. It located weak sulphide mineralization in a variety of altered felsic and intermediate volcanic rocks but but failed to locate what it was looking for, a discrete gold zone. The best results were from a silicified shear zone which ran 0.17%Cu 0.99 g/tAg over 67 metres. It hasn't located the source of the detrital gold in Obling Creek.

LAND-USE:

- Preparing to give a presentation on subsurface resources to In-Shuck-ch N'Quat'Qua on behalf of Jim Britton.

- MOF still requesting tenure maps and ownership information despite their having access to their own "MAPVIEW" computer-based mineral tenure access sytem.

Subject: Southwest Region Update - October 9, 1997

ISSUES:

Debate

1. Whittaker Ventures have confirmed that they are abandoning their 900 exploration and bulk sample project, citing lack of confidence in the future of the property due to community wide guidelines, reactivation of access roads, and an unresolvable bureaucracy. Reclamation issues on the property remain to be addressed.

2. Permit for the controversial Baker Road Quarry on Saltspring Island has been finalized and will be issued upon receipt of funding.

Upper CRIT

3. Whittaker One/Copper, which project on Quadra Island was issued a permit for an airborne geophysics program; proposal for baseline geophysical study in Radium-Sensor designated area has been approved by agencies and public due to sensitive LIA status of land; permit alarmed reaction from Quadra Island Forest Board.

(40)

4. Ted and I met with Allard to discuss outstanding issues on proposed baseline Road permit; good progress made; issues appear to be resolved.

5. District of West Coast have filed environmental report for proposed industrial waste dump recovery project in South Wellington; permit decision expected soon, although RDN zoning issue still to be resolved.

6. District of Nanaimo has given approval-in-principle to proposed aggregate study; TA will work with RDN and MOTH to develop detailed terms of reference.

7. Site inspection and on-site meeting has been scheduled for the upper mine on October 21 and 23.

Subject: SOUTHWESTERN REGION MONTHLY REPORT: MAY I

EXPLORATION:

Copper Road/Cliff

- Network One Holding Corp. has optioned 226 units on Quadra Island. The property covers the Copper Road occurrence where there is a reported reserve of 120,000 tonnes grading 2%-6% copper and 0.47 o/t silver and the Copper Cliff prospect where there is a reported mineral resource of 3.2 million tons grading 2% copper. The locals are already up in arms!

- First Choice Industries plans to drill a further 21 holes on the Knob Hill property near Holberg. It will be looking for high-grade gold in epithermal veins in the alteration zone it located last year.

- T'Sable Coal Corp. plans to drive a decline in the T'Sable Coal field and extract a 90,000 tonne bulk sample from the No. 1 coal seam for thermal and metallurgical burn tests. The company has identified an in situ resource of 39 million tonnes that may be amenable to underground mining.

Cobalt Star

Visited (1) the Fandora Au vein property near Tofino with Greg Carriere, (2) the Dragon Cu, Pb, Zn VMS property near Gold River with Efram Specogna, (3) the Cobalt Star Cu, Au, Co, Magnetite skarn deposit near Middle Quinsam Lake with Dan Berkshire and (4) the Gilkie Cu skarn property near Upper Campbell Lake with Albert Dorion.

LAND-USE:

- Government has released its Spotted Owl Management Plan for the Lower Mainland. It creates 18 "special management areas" totalling 204,000 hectares.

OFFICE:

- Interesting and constructive meetings with both the Deputy and Assistant Deputy Ministers to discuss the new "Mineral Development Office" in Vancouver.

- Visited Macktush Property near Port Alberni with Greg Carriere and representatives of SYMC Resources and MOF to review possible damage to

Stanwood (Corney) Sharon

News Release . . . Appointments; exploration to start on Copper Road claims

Mr Robert Card reports

At the AGM held March 26 1992, the following were elected directors: Robert L. Card; Ronald W. Card, P.Eng; Minaz F. Devji; James S. Kermeen, P.Eng; and S. Gail Stanwood. Mr Ronald Card was named president and Mr Robert Card was named secretary.

The company expects to start an initial and preliminary exploration program on the Copper Road claims in the Nanaimo mining division, during the next two weeks. The program calls for some geological mapping and magnetometer testing over the known ore shoots and some parallel structure with a view to expanding the scope of a more comprehensive exploration program to follow up the work.
