

Aug. 25/96

Croy 94C 008, 066 - chopper from
882155
Ushinka Camp

CROY

- Bas Lane Sugny +20%
For Malindal

- Cabin in alpine - previous drilling in '88
- look at orep.
- Discovery using as core logging facility. NW-SE zone / 85° NE

Photo: massive "bull" gtz veins in chloritic schist (fault zone) in amphib host. Also take Gp. augite por. andesite.

Photo Bedded (replacement?) pinch-spread beds of massive epidote. Note - also cise-gr. gabbroic "nodules" above epidote "layer"

Vein (+ cpy + mag) @ NW / 85° NE
Min. appears to be related to shear in augite and. with/without gtz + carb + ep ± mag.
Veins (2 or 3 parallel) - largest ~ 0.5m

[Camped overnight @ Ushinka LK.]
