HUDSON BAY MNT. - CLIMAX

100 m. tons of 0.297 %  $MoS_2$

incl. 70 m. tons of 0.34 %  $MoS_2$

plus tungsten values (anything  $> 0.04\%$  Sn)  
av. 0.07% Sn

Adit elev. 3500'  
Ore draw 2000'

Jan. 1/74

- All deeded land to Balkley R. for millsite + townsite  
~ \$100,000 each to Bill McGowan + ? for fraction of orebody.

Pre-DBAC  
'Explore BC' meeting

THE *Fairmont*  
ROYAL YORK  
DAVIDSON

882254

→ Davidson

Mar. 7/07

- with Blue Pearl Mining in Toronto (Jan McDonald) [+ Paul Wojdak]
- just completing a drilling program targeting 'additional' info in 'new' zone ~ 300m below existing resources  
→ "No real log" (cont.)
- Proj. schedule is a little behind time, but feasibility study should be delivered by mid-'07.
- may 'bump' daily throughput to 5000 tpd shortly after start up (main focus is still on achieving prod. @ 2000 tpd) - have decided to ship 'raw' ore to Endako (i.e. no processing onsite)
- Capital costs ~ \$50M

June 23/86

HB Mtn. - Rhyolite

- bought 100% for \$1 m from Climax

- incl. Climax buildings + core + all land
- Climax had asked for \$6 m - deal with Don Davidson
- plan to "high grade" rich sections of moly dep.  
(i.e. > 1% + also .7% MoS<sub>2</sub>)
- also plan to do expl'n on Simpson Ct. c/s.  
(high grade vein stuff)
- "Will put into production this year" - Ha!  
(Need rehabilitation 4/6!!)

# CL / MAX

- Dorothy Atkinson

Mar. 12/82

New feasibility study

~ 30 m tons @ .26%  $MoS_2$   
.07%  $WO_3$

Yorke-Hardy visit - Nov. 19/79

- toured with 4 geol. from B.P. Minerals (incl. Chris Bates)  
+ leader, Dorothy Atkinson.

approx. 156 ddh to date  
on ~~the~~ 11th hole for this yr. (10Q size)

- got sample of 'brain texture' from previous core.

- super drill at work

- took several pictures u/g.

- not uncommon in ore zone to get 60 ft. of  $.6\frac{1}{2}$  Nos

- 1st 1979 ddh returned good assays.
