

DEL SANTO

Sat. Sept. 12/98
cloudy + 15°C

- with Will Tompson

Photo - looking S towards '98
trenching (best values to W)

Photo - looking W from DDH above
west end of trenches.

→ Besshi-style VMS
(Mn-rich) - ab. pyralusite

1m limey beds

tight, isoclinal folding

→ ab. magnetite + po

- First 2 ddh in '98 drilled
from north, to main showing
did NOT intersect zone
(due to folding?)

→ good (untested) mag anomaly
on north side of rd. (a parallel
to 'Main'-zone) - Fold? (OVER?)

882315

- any similarities to LAKEVIEW
(Love Warren)

DEL SANTO Aug. 11/00

Sunny +22°C

- chat with Will Thompson
in Smithers MEM office.

- have ~\$120k budget

- magnetic anomaly reversal
(as determined by Randy Enkin,
OSL)
