

## FANDORA

Oct. 13/98

(21 km NE of Tofino)

- discussion with Doublestar Res. (Alan Savage & Rich and Billingsley)
- Doublestar plans (this fall) to take a 350 ton "bulk" sample of oxidized vein material (i.e. very easy cyanide leach) [working with Greg Carrier, MEM-Navaho]
- 415 ft wide gte. vein (900m long)
- 1950 Reserves (u/G): 200,000 tons @ 0.28 g/t Au
- [Ref. Apr. 17/98 Stockwatch, p. 12]
- "Fandora vein is remarkably continuous"
