TOM,

Here are a few slides of Ramrod's Vine and Fors projects.

Unfortunately, we don't have anything that I think would be really suitable.

1. Vine; view looking south over the trenched Vine Vein on the lower right of the screen to Moyie Lake in the background. Ramrod's field office/core logging facility is in the central lower portion of the slide - buildings and core racks evident.
- 2 & 3 Vine core facility in middle ground and trenched Vine Vein in background.
4. Cross section of the Fors vent. It is now somewhat outdated but gives the general idea, particularly the similarity to Sullivan. Comparatively little evidence of the vent activity was exposed at surface.

I trust these will be of some use.

Please return the slides when you are finished with them.

Sincerely,

Peter Klewchuk

Dear Peter:

RE: FORS/VINE PROPERTY SLIDES

Thank you very much for the loan of the slides for my NWMA talk in Spokane on December 2, 1993. I am returning the 4 slides, as requested.

I will be giving an updated version of the "BC Highlights" talk at Roundup, January 1994, in Vancouver and would appreciate any further slides which you feel would be appropriate.

Yours sincerely

Tom G. Schroeter, P. Eng
