93 N207 FIELD (S)

FRAUFri, Aug. 1 9/03
Sunny + 22°C

- with Bob Lane

Host: Ron Wells, Golden Hat Res. (+ daughter)
+ Mart + Paul Watt (proprietor) \$750K

Frontier Drilling (Kamloops)

Phase 2: 6000 ft.

203 Ma

1.25 km SW trend.

[N of TAS prop.]

Hostk = monzodiorite → GD

- best grades (> 1 g/t Au) in intrusive,
near contact with seds.Orig. Haslinger showings (with zone) over 150m
qtz veins - incl. > 1% As, cpy, ZnS, Pb
- polymetallic

FR-33, 34, 35 - Phase 1 (south of Haslinger)

36, 37 - to east (+ po + chlorite)

Phase 2 - cont'd out to east

E-W Au-in-soil anomalies

05-44-145m 2" qtz vein with ribbon MoS₂
in monzodior.- some other
sec. of MoS₂

Photo:

photo: pink axinite veinlet (+ nearby MoS₂)

Photos cpy + po chl in monzodite.
Photo Look NE over N zone,
over Bullion Trend (3 km trend)

Photo Look NW along Bullion Trend
towards North zone
(ddh in foreground to it. on road)

Look @ ms vein tested by DDH-05-44
(7m of sulphide veinlets) po+cpy

Look @ ms vein along roadside (+ trench)
- DDH-05-39 tested (cpy+po)

better gold values appear assoc. with
qtz veinlets (\pm po/py)
