Importance: High

Folks, I will call John Lepinski today. I suggest that Claudia or I could forward John a copy of my "London" presentation, to be delivered in Londo next week. Otherwise (and additionally?), Duane Anderson (Greg McKillop) should be consulted? Please CONFIRM asap what your choice is. Cheers,

Tom

Tom

Could you look after this request per Dave who is on the road in Kamloops.

Thanks

Please contact John Lupinski at Getty Copper 604 931-3231 or getty@telus.net. He is asking for a one or two pager about how BC's Mining Policies and Programs have improved mining investment in B.C. He is working with a client in South America who is interested in a project but feels that BC is the worst place in the world to invest. I'm not sure what we have in the can on this so please cc me on your note so I have a sense of what we have.

Thanks

He's on the road (in the field); I haven't been 'alerted'. Any way for me to see the complete (package) presentations before I leave this Friday pm?

Tom,

I've put the presentations on the MEM shared drive under 'Lefebure' so Dave has access to your presentation (and the others) if he wishes to forward it. (I've given him directions to the file in a previous e-mail). C.

That's great. Thanks very much. It would be interesting to get the client's feedback to see whether this is the kind of information he needs to change his thinking about BC.

Spoke to Vic Preto, member of Getty Copper executive, yesterday and faxed him copy of 2 page attachment (attached) that we prepared for Mines Ministers Conference as attachment to BN on BC Govt Initiatives to support mining industry.

Subsequent discussions with Vic P indicated that summary was satisfactory and that he had faxed to John L.

<< File: Attachment to Sep 2003 Mines Ministers Note on BC Policies and Programs for the Mining Sector1.doc >>

Comments, etc. welcome,

Duane A.

Tom has directed this person to the BCYCM web site to view his London presentation. In addition, though I think he's looking for some firm policy on this to convince a South American client, BC is a good place to invest. Could you please send him what is most appropriate. cc me will you?
Thanks

Subject: Kamloops Summary to July 24/98

Issues

HVC

HVC - By virtue of an appeal to the Ministry of Labour, first line supervisors at HVC now have the right to joint the union (USW). The company intends to appeal this decision. I have also heard indirectly that because of this decision, HVC is putting the proposed hydrometallurgical copper refinery project on hold until it is resolved.

Tulameen Coal - Pacific West Coal is proceeding with baseline environmental studies to meet BCE requirements. In their referral response, which was done at the last minute, BCE has given us the impression that they have misunderstood some of the project details. E&M staff will meet with BCE and the proponent in August, when more baseline data has been collected.

Bruce Perry

Getty Copper - This project has been put on hold due, in part, to dismissal of the project manger and to difficulty in raising financing.

Lawrence Pit, Lake Country - following the applicant's decision to withdraw his application, we are still receiving calls that he is still hauling material. Inspection was done this week.

Red Lake Quarry - Western Industrial Clay Products has advised Eric Beresford that he may be called to an Arbitration Board hearing regarding access to mineral claims on private property.

Blackdome - project is underway with plans to hire u/g miners in the near future.
