

GOLD CANYONThur. July 31/03
Sunny +40°C

(with David Terry)

- Caribou Ck. Rd. → ~ 10.7 km
take right branch (Goat Canyon Rd.)
- Follow ~ 7.4 km to centre of cfs.

~~E 441 627 N 554 0837~~Box 3 (to rt.) up to km 24.5-25 km
road cut.

GC 002 Min. zone @ ~ 105° N

Massive sul. lenses/pools in
horntised metaseds (foliation
parallel to 105° trend of min.

~~for~~
another showing along rd. to W
(trench above in metaseds - no min.)
- Fin. gr. lamprophyre dykes.

[See: 'Handout' for more details]

GOLD CANYON Nov 24/05

- chat with Ken Murray
in Van. MSO
- project - "dead"
- drilling couldn't find
more.

GOLD CANYONSat July 10/04
Sunny + 23°C

- with Dave Grieve
 - Hosts: Bernie Augsten
Ken Murray
- AR 26,950
- Airborne geophysical survey (Fugro) completed earlier in spring
 - Area drilled in 2003 shows a good correlation both with total field magnetic data and the vertical gradient reduction.
 - Magnetic anomaly is part of a suite of discrete anomalies > 600 m strike along the east flank of conductive zone!

Phase 1: IPok (incl. airborne)Phase 2: + Drilling in Sept.

- series of mag highs
- Bernie also found some VG + telluride in panning soils
- Line cutting + soil sampling in progress then IP; then ddh
(water problem late in yr. - ie. have need water trucks)
