

GOLDEN BEAR AREA

Sept. 1965

- Discussion @ Barrick Gold office in Van
 present:

Richard Mann

Dave Heberlein

Marsh Stewart

Albert

Rob Brown

} Van office

Bill Lindquist

+ 2 others

- Nevada
office

Interest/Target: Sediment-hosted Au
 (Cathin-like)

- after field season (to Nath) @ Kizmet project,
 Barrick spent some (short) time @ Golden Bear (area)
 → impressed by decalcification + hosts rx.

- Nevada folks were impressed at oxide host
 (Permian ls/dolostones) + grades

- TGS provided brief overview of NW BC
 + focused in on history + devel. of
 gold targets around Golden Bear

(loaned Roundup poster for scanning)
 - quite interested in fluid inclusion data
 (TGS not aware of (forgot)?)

→ Barrick then inquired about: 1) Spanish Mt. 2) Toiyabe
 + Mechako Plateau.
