

Company Name: Aurun Mines Ltd.  
Property Name: Hail - Harper Cr.

Location: 7 Km. south of Vavenby, B.C. Road access.

Target Commodity: Re examination of known deposit for gold and titanium

1986 Budget: \$90,000<sup>00</sup>

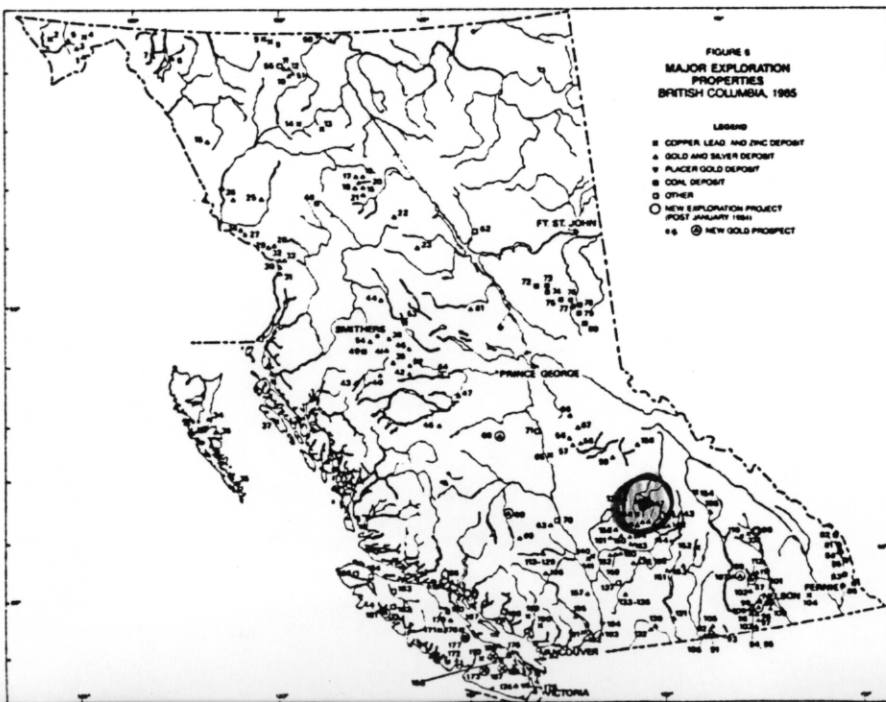

Previous Expenditure: -

Capsule Summary: Optioned from Quebec Cartier Mining Co. Reserves = 53,000,000 tonnes 1.6:1 waste:ore 0.37% Cu and 0.016% molybdenum

Bench tests = 2.8<sup>(.08)</sup> gm Au 88.4<sup>(2.6)</sup> gm Ag per tonne.

3% to 4% rutile from grab samples.

Geological concepts relating to the genesis of the deposit generally regarded as metamorphic - hydrothermal in origin; now it is thought to be volcanic exhalative. This theory opens up the possibility of precious metals being present & associated with the sulphides

### 1986 Program

- sampling,
- petrographic, mineralogic and metallurgic studies
- grid layout
- Geophysics IP, EM. Mag surveys.

Grant  
\$15,000
